Complex Dynamical Systems in Education Matthijs Koopmans, Dimitrios Stamovlasis, 2016-02-19 This book capitalizes on the developments in dynamical systems and education by presenting some of the most recent advances in this area in seventeen non overlapping chapters The first half of the book discusses the conceptual framework of complex dynamical systems and its applicability to educational processes The second half presents a set of empirical studies that illustrate the use of various research methodologies to investigate complex dynamical processes in education and help the reader appreciate what we learn about dynamical processes in education from using these approaches **Labs of Our Own** Sig / Sara Giordano, 2025-02-11 From climate change to COVID 19 to reproductive justice there has been deep political polarization around science Labs of Our Own provides a unique entry point into these twenty first century science wars by focusing on our affective relationships to science The book delves into various sites where scientists teachers artists and activists claim to create more democratic access to science from DIY biology community labs to feminist classrooms to activist science practitioners The reader will find that these claims for and attempts at democratic sciences not only impact what counts as science and who counts as a scientist but reconfigure who is included in the proper public Instead of arguing for a knee jerk defense of science against right wing attacks Labs of Our Own builds the case for a feminist antiracist decolonial queer science tinkering practice that intentionally politically and ethically acts to produce new challenges to the definition and boundaries of the human *Emerging Applications of Control and Systems Theory* Roberto Tempo, Stephen Yurkovich, Pradeep Misra, 2018-02-24 This book celebrates Professor Mathukumalli Vidyasagar s outstanding achievements in systems control robotics statistical learning computational biology and allied areas The contributions in the book summarize the content of invited lectures given at the workshop Emerging Applications of Control and Systems Theory EACST17 held at the University of Texas at Dallas in late September 2017 in honor of Professor Vidyasagar s seventieth birthday These contributions are the work of twenty eight distinguished speakers from eight countries and are related to Professor Vidyasagar s areas of research This Festschrift volume will remain as a permanent scientific record of this event *Russian Modernization* Markku Kivinen, Brendan G. Nullifying God H. Robert Wilson Ph.D.,2018-01-01 Evolution and Creation are in a spiritual battle Evolution scientists ignore dismiss and unequivocally reject Creation out of hand It is not science or fact as evolution is they say However Nullifying God shows that random Darwinian evolution does not have the direct evidence required to support the claim Not only that but it provides contrary evidence that evolution is biologically impossible Because that is the case evolution can only persist in the unchallengeable authority it needs to maintain its position by actively attempting to nullify its alternative Creation and therefore the Bible and God Nullifying God was especially written to empower and benefit believers who are not familiar with science to show them that evolution cannot be fact and is not science It does so by 1 providing them with a core foundation of applied science principles to rationally question evolution s claims then 2 guiding them into solid clear knowledge of why evolution is biologically impossible and finally 3 presenting them with examples that document evolution s attempts to nullify God The bottom line is Biblical Creation is the only answer that explains life *In Their Place* Stephen Crossley,2017-08-20 This book critiques how impoverished communities are represented by politicians the media academics and policy makers and how our understanding of these neighbourhoods is often misleadingly shaped by these stories The alleged behavioural failings of poor people have attracted a great deal of academic and political scrutiny Spatial inequalities

are also well documented and poor neighbourhoods have been extensively researched. However other spaces have been reimagined in different ways by politicians, academics, journalists and social reformers. These imagined geographies include exoticised slums, cities being reclaimed by nature, the street and domestic spaces like the kitchen or even the bedroom. In *Their Place* highlights how these spaces are represented and how these representations are deployed manipulating political and media discourses around the individuals and communities who live there. These distortions are often used to keep people in their place by making sure everyone knows where the poor belong. This book will reorient those interested in human geography away from deprived neighbourhoods and back to the foundational spaces where political decisions and poverty are made in Britain today. Media Crossroads Paula J. Massood, Angel Daniel Matos, Pamela Robertson Wojcik, 2021-02-08. The contributors to *Media Crossroads* examine space and place in media as they intersect with sexuality, race, ethnicity, age, class and ability. Considering a wide range of film, television, video games and other media, the authors show how spaces from the large and fantastical to the intimate and virtual are shaped by the social interactions and intersections staged within them. The highly teachable essays include analyses of media representations of urban life and gentrification, the ways video games allow users to adopt an experiential understanding of space, the intersection of the regulation of bodies and spaces and how style and aesthetics can influence intersectional thinking. Whether interrogating the construction of Portland as a white utopia in *Portlandia* or the link between queerness and the spatial design and gaming mechanics in the *Legend of Zelda* video game series, the contributors deepen understanding of screen cultures in ways that redefine conversations around space studies in film and media. India and the Indians have made some progress in 75 years after Independence. The number of literates has gone up. The Indians have become healthier and their life expectancy at birth has gone up. The proportion of people below the poverty line has also halved. But the shine from the story fades when India is compared with that of the East Asian Tigers and China. It looks good but not good enough. India looks far away from the glory it seeks. This issue forms the core subject matter of this book. It tries to argue why India could not achieve more and what all it could have achieved. It paints a picture of its possible future and highlights the areas that need immediate attention. The Black and White Rainbow Carolyn Holmes, 2020-10-13. Nation building imperatives compel citizens to focus on what makes them similar and what binds them together, forgetting what makes them different. Democratic institution building on the other hand requires fostering opposition through conducting multiparty elections and encouraging debate. Leaders of democratic factions like parties or interest groups can consolidate their power by emphasizing difference.

But when held in tension these two impulses toward remembering difference and forgetting it between focusing on unity and encouraging division are mutually constitutive of sustainable democracy Based on ethnographic and interview based fieldwork conducted in 2012 13 *The Black and White Rainbow Reconciliation Opposition and Nation Building in Democratic South Africa* explores various themes of nation and democracy building including the emotional and banal content of symbols of the post apartheid state the ways that gender and race condition nascent nationalism the public performance of nationalism and other group based identities integration and sharing of space language diversity and the role of democratic functioning including party politics and modes of opposition Each of these thematic chapters aims to explicate a feature of the multifaceted nature of identity building and link the South African case to broader literatures on both nationalism and democracy

Honour Based Crimes and the Law Mukaddes Gorar, 2021-05-10 Honour based violence and abuse manifests itself in different forms and this book offers a comprehensive understanding of this phenomenon This book argues that the limits of honour crimes must be defined more widely so that they include conducts and behaviours that originate from the patriarchal notion of honour such as honour based oppression and breast ironing The book provides a critical analysis and synthesis of the law in England and Wales and in the international human rights sphere The relevant domestic legislation and cases are examined to reflect on whether adequate protection is provided for the victims and potential victims of honour based violence and abuse Since honour based violence is a violation of human rights the relevant international human rights law is examined to illustrate the perception of such crimes in the international arena The effectiveness of any remedy for victims of honour based violence and abuse depends on its capability to change deep rooted behaviours in communities with honour based patriarchal values This book argues that the law does not provide the effective impact required in part due to patriarchal structures and that more efforts should be dedicated to changes in education It is held that there is a need for an educational programme that is especially designed to tackle violence and promote gender equality The book will be essential reading for academics researchers and policy makers working in the areas of Human Rights Law Criminal Law and Gender Studies
