Teacher Templates for Microsoft Works(r) Javier Martinez, 2000-08 *From Grade Books to Graphic Organizers* David A. Dockterman, 2003 A practical guide to how computers can help teachers inside and outside the classroom **Sport Education Seasons** Sean M. Bulger, 2007 Finally a sport resource that offers in depth complete seasons applying the sport education model of teaching and coaching This book and CD ROM package includes 68 complete sessions and lessons for three complete seasons basketball soccer and fitness education that you can use in their entirety or choose lessons to reinforce your existing program It also includes more than 150 reproducibles in the book and 400 on the CD ROM BOOK JACKET *Teacher Templates for Microsoft Office* Javier Martinez, Joseph K. Robinson, 2000 **Microsoft Excel for Terrified Teachers** Jan Ray, 2003 *Technology Application Competencies for K-12 Teachers* Chen, Irene, Thielemann, Jane, 2007-07-31 This book is designed to strengthen understanding of the critical information in the framework for technology application competencies for K 12 teachers Provided by publisher *Computers* Larry E. Long, Nancy Long, 2002 This work is an introductory course in computers and information technology or in computer competency often offered in Business CIS or Computer Science Designed to aid the competency needs of students this text supplements package provides an overview of computing concepts and IT applications all in a format that allows instructors the flexibility to meet their course s education objectives It aims to strike a balance between efficiency of presentation and content that holds the student s interest and invites learning Only topics critical to general information technology competency are covered in order to provide the breadth of topics necessary to the understanding that is applicable today and in the future The text includes an extended presentation of ethics in IT and explores IT laboratories *Spreadsheet Magic* Pamela Lewis, 2006 Step by step instructions for using spreadsheets to teach students in kindergarten through sixth grade Lessons cover a variety of subject areas language arts social studies science music and mathematics *Template Directory for Libraries, 1989-1990* Randy Dykhuis, 1990 *Understanding Statistics in the Behavioral Sciences* Roger Bakeman, Byron F. Robinson, 2005-03-23 Understanding Statistics in the Behavioral Sciences is designed to help readers understand research reports analyze data and familiarize themselves with the conceptual underpinnings of statistical analyses used in behavioral science literature The authors review statistics in a way that is intended to reduce anxiety for students who feel intimidated by statistics Conceptual underpinnings and practical applications are stressed whereas algebraic derivations and complex formulas are reduced New ideas are presented in the context of a few recurring examples which allows readers to focus more on the new statistical concepts than on the details of different studies The authors selection and organization of topics is slightly different from the ordinary introductory textbook It is motivated by the needs of a behavioral science student or someone in clinical practice rather than by formal mathematical properties The book begins with hypothesis testing and then considers how hypothesis testing is used in conjunction with statistical designs and tests to answer research questions In addition this book treats

analysis of variance as another application of multiple regression. With this integrated unified approach, students simultaneously learn about multiple regression and how to analyze data associated with basic analysis of variance and covariance designs. Students confront fewer topics, but those they do encounter possess considerable more power, generality, and practical importance. This integrated approach helps to simplify topics that often cause confusion. Understanding Statistics in the Behavioral Sciences features computer-based exercises, many of which rely on spreadsheets, help the reader perform statistical analyses and compare and verify the results using either SPSS or SAS. These exercises also provide an opportunity to explore definitional formulas by altering raw data or terms within a formula and immediately see the consequences, thus providing a deeper understanding of the basic concepts. Key terms and symbols are boxed when first introduced and repeated in a glossary to make them easier to find at review time. Numerous tables and graphs, including spreadsheet printouts and figures, help students visualize the most critical concepts. This book is intended as a text for introductory behavioral science statistics. It will appeal to instructors who want a relatively brief text. The book's active approach to learning works well both in the classroom and for individual self study.
