2.1 Read the passage below and answer the questions that follow.

Peat lands are special wetlands that play a very important role in ecology. A peat land, of approximately 6 000 years old, near Mafikang is almost destroyed because of excessive extraction of water from the nearby Molepo river. The water is extracted for human consumption.

Peat lands like the one near Malling is exceptional and play an important role in storing water as well as preventing climate changes.

Dr. Pat-Louis Drunding said that carbon that is "held" or "stored" by peat lands combats climate change because it decreases the amount of carbon in the atmosphere.

Peat lands trap about one third of the world's carbon. Approximately 50% of wetlands worldwide are peat lands. However in South Africa about 10% of the wetlands are peat lands.

Grundling explained that peat lands can hold about 1 000 times its own mass in water. This replenishes the water table and is the source that keeps streams flowing. The "sponge effect" of the peat also makes it possible to store water that is then released during the seasons.

Dr. Grunwald said that it might be too late to restore the peat land near Malling, but it might be possible to restore some parts of it if more water is supplied to this peat land.

The result of this destruction is depletion of the water table. The habitat of numerous fish and bird species that lived in the canal bed was also destroyed.

Grade Life Science Exam Paper 2014:

Collaborating for Inquiry-Based Learning Virginia L. Wallace, Whitney N. Husid, 2016-12-05 This newly updated and expanded second edition of Collaborating for Inquiry Based Learning explains effective IBL scaffolding and the school librarian's role as the lead in the collaborative process of inquiry based teaching. Want to learn how to easily put inquiry theory into practice in your school library? This newly revised and expanded practical resource links pedagogical theory, research, and practical application of Inquiry Based Learning (IBL). An important resource for school librarians, classroom teachers, and school library preparation programs, this thoroughly updated second edition of Collaborating for Inquiry Based Learning explores Inquiry Based Learning in greater depth and addresses new educational insights. Readers will learn the new research model PLAN and understand how the steps Prepare, Learn, Analyze, and New Discoveries define a deliberative metacognitive process that offers simplicity and flexibility. This step by step guide moves new and experienced educators seamlessly from assessment of students' needs and prior knowledge through formative and summative assessments to reflection. It offers practical applications for immediate use by educators with students and makes it clear why the school librarian is ideally suited to be the lead in the collaborative process of inquiry based teaching. This comprehensive guide to IBL is appropriate as a main text or supplementary reading for courses in instructional design and curriculum.

The Best Class You Never Taught Alexis Wiggins, 2017-09-27 The best classes have a life of their own powered by student led conversations that explore texts, ideas, and essential questions. In these classes, the teacher's role shifts from star player to observer and coach as the students think critically, work collaboratively, participate fully, behave ethically, ask and answer high level questions, support their ideas with evidence, and evaluate and assess their own work. The Spider Web Discussion is a simple technique that puts this kind of class within every teacher's reach. The name comes from the weblike diagram the observer makes to record interactions as students actively participate in the discussion, lead and support one another's learning, and build community. It's proven to work across all subject areas and with all ages, and you only need a little know-how, a rubric, and paper and pencil to get started. As students practice Spider Web Discussion, they become stronger communicators, more empathetic teammates, better problem solvers, and more independent learners, college and career ready skills that serve them well in the classroom and beyond. Educator Alexis Wiggins provides a step by step guide for the implementation of Spider Web Discussion, covering everything from introducing the technique to creating rubrics for discussion, self-assessment, to the nuts and bolts of charting the conversations and using the data collected for formative assessment. She also shares troubleshooting tips, ideas for assessment and group grading, and the experiences of real teachers and students who use the technique to develop and share content knowledge in a way that's both revolutionary and truly inspiring.

Teaching and Learning STEM Richard M. Felder, Rebecca Brent, 2016-02-22 Rethink traditional teaching methods to improve student learning and retention in STEM. Educational research has repeatedly shown that compared to traditional teacher-centered instruction, certain learner-centered methods lead to improved learning outcomes, greater development of critical high-level skills, and increased retention in science, technology, engineering, and mathematics STEM disciplines. *Teaching and Learning STEM* presents a trove of practical, research-based strategies for designing and teaching STEM courses at the university, community college, and high school levels. The book draws on the authors' extensive backgrounds and decades of experience in STEM education and faculty development. Its engaging and well-illustrated descriptions will equip you to implement the strategies in your courses and to deal effectively with problems including student resistance that might occur in the implementation. The book will help you plan and conduct class sessions in which students are actively engaged, no matter how large the class is. Make good use of technology in face-to-face, online, and hybrid courses and flipped classrooms. Assess how well students are acquiring the knowledge, skills, and conceptual understanding the course is designed to teach. Help students develop expert problem-solving skills and skills in communication, creative thinking, critical thinking, high performance, teamwork, and self-directed learning. Meet the learning needs of STEM students with a broad diversity of attributes and backgrounds. The strategies presented in *Teaching and Learning STEM* don't require revolutionary, time-intensive changes in your teaching but rather a gradual integration of traditional and new methods. The result will be continual improvement in your teaching and your students' learning. More information about *Teaching and Learning STEM* can be found at <http://educationdesignsinc.com>. Book including its preface, foreword, table of contents, first chapter, a reading guide, and reviews in 10 prominent STEM education journals.
