Australia Teaching to Avoid Plagiarism successfully turns attention away from the detection and punishment of plagiarism and focuses instead on understanding and prevention through the promotion of good source use Combining practical activities based on real life examples with wide ranging original research this important book should be required reading not only for staff development officers and lecturers but more widely throughout the higher education community Maggie Charles Oxford University Language Centre Diane Pecorari s insightful research and scholarship on plagiarism is used to excellent effect in this book which advocates a proactive rather than reactive approach to the difficulties faced by students in learning how to integrate their source texts Thoughtful activities and discussion questions aimed at staff development are teamed with advice on ways to build in support within disciplinary writing which will help students master the necessary academic skills to avoid plagiarism The emphasis quite rightly is also on helping students understand how plagiarism disrupts the ethical values of the academy and is not just another hurdle placed in their way by academic insiders Dr Ann Hewings Director Centre for Language and Communication The Open University As stated by Diane Pecorari in the first sentence of this excellent volume plagiarism is a problem in our universities The volume demonstrates clearly how teachers and students can deal with this problem by developing a better understanding of the phenomenon on the one hand and developing specific skills in dealing with it on the other Working from the principle that an ounce of prevention is worth a pound of cure Diane Pecorari argues for a proactive approach to handling issues of plagiarism with an emphasis on the need to train students how to deal appropriately with sources As well as a clear exposition of the theoretical issues at stake the book contains a wealth of practical activities and discussion questions which will allow readers to develop the sort of competence in dealing with plagiarism that is the goal of the volume Professor John Flowerdew City University of Hong Kong

Workbook Steven Heighon,2011 A fresh and provocative picture of what it means to create literature this collection of Steven Heighon s notes to himself as he writes peeks into the mind of an acclaimed author The short pieces reveal Heighon s pointed cutting take on his own work and materialize the musings and meditations that come to him as he scribbles Offering new perspectives and insights into the creative process this wholly original book shows what lies outside the pages of the bestsellers written by this Canadian author **Time to Write, Second Edition** John Sylvester Lofty,2015-02-10 To read John s work is to take on the role of a patient listener A book like a piece of music is scored for time and I feel Time to Write is scored adagio I believe that Time to Write can be read as a critique of the time chopping approach to education and an argument for presence for being fully open to experience for being there To do good work we must enter something like island time or what John calls existential time or what is sometimes called flow when we lose at least temporarily a sense of clock time from the Foreword by Thomas Newkirk Twenty five years ago John Sylvester Lofty studied the influence of cultural time values on students resistance to writing instruction in an isolated Maine fishing community For the new edition of Time to Write Lofty returned to the island to consider how social and educational developments in the intervening years

may have affected both local culture and attitudes toward education. Lofty discovered how the island time values that previously informed students' literacy learning have been transformed by outside influences including technology, social media, and the influx of new residents from urban areas. Building on the ethnographic findings of the original study, the new edition analyzes the current conflict between the digital age time values of constant connections and instant communication and those of school-based literacy. Lofty examines the new literacies now essential for students in a technologically connected world: both those who aspire to continue the traditional island work of lobster fishing and for the many who now choose to pursue other careers and attend college on the mainland.

The Best of the Grammarians Francesca Schironi, 2018-10-31
A founding father of the art of philology, Aristarchus of Samothrace (216–144 BCE) made a profound contribution to ancient scholarship. In his study of Homer's *Iliad*, his methods and principles inevitably informed even reshaped his edition of the epic. This systematic study places Aristarchus and his fragments preserved in the *Iliadic scholia* or marginal annotations in the context and cultural environment of his own time. Francesca Schironi presents a more robust picture of Aristarchus as a scholar than anyone has offered previously. Based on her analysis of over 4,300 fragments from his commentary on the *Iliad*, she reconstructs Aristarchus' methodology and its relationship to earlier scholarship, especially Aristotelian poetics. Schironi departs from the standard commentary on individual fragments and instead organizes them by topic to produce a rigorous scholarly examination of how Aristarchus worked. Combining the accuracy and detail of traditional philology with a big picture study of recurrent patterns and methodological trends across Aristarchus' work, this volume offers a new approach to scholarship in Alexandrian and classical philology. It will be the go-to reference book on this topic for many years to come and will usher in a new way of addressing the highly technical work of ancient scholars without losing philological accuracy. This book will be valuable to classicists and philologists interested in Homer and Homeric criticism in antiquity, Hellenistic scholarship, and ancient literary criticism.
