Ordering America William H. Young, 2010 Ordering America painting a felicitous portrait of Western civilization shows that its defining ideals rooted in man s common human nature a perception newly substantiated by modern evolutionary psychology were best fulfilled by realization of the American founding order Twentieth century progressivism and postmodern multiculturalism detoured America down the way of social constructionism human nature and equality are produced by culture and the state through groups The book sets a course to revive the

Western ideals and return to an opportune center right American order applying latest scientific insights and restoring individual responsibility and reciprocity under more limited still energetic government befitting our century **Three Theological Mistakes** Ric Machuga,2015-01-05 Is the existence of God a matter of faith or knowledge Does God sometimes act miraculously or are there physical causes for everything Is morality absolute or relative Are humans truly free or does God s sovereignty determine everything When bad things happen is God the cause or are they the fault of humans Too frequently Christians answer these questions with a Yes to one side and a No to the other side Thomas Aquinas and Karl Barth answer Yes to both Following their model Machuga defends a third way which transcends the Enlightenment dichotomies of fideism vs rationalism supernaturalism vs naturalism relativism vs absolutism free will vs predestination and God s justice vs his mercy Machuga begins by showing how these false dichotomies grew out of the Enlightenment assumptions of mechanism universal quantification and mono causation He then corrects these demonstrably dubious assumptions by articulating a theory of dual causation The result is a thoroughly biblical understanding of God miracles and free will that can withstand the contemporary criticisms of both science and philosophy Dynamic Structure of Reality Nelson R. Orringer,2010-10-01 Dynamic Structure of Reality makes available in English some of the most mature thought of the modern Spanish philosopher Xavier Zubiri He first presented this material as a set of 1968 public lectures in Madrid They were collected edited and published in 1989 as Estructura din mica de la realidad In 1962 Zubiri had published Sobre la esencia On essence a work of metaphysics that was praised by critics with one qualification its treatment of reality was too static The 1968 course was devised as a response to those critics Dynamic Structure of Reality retraces the road Hegel traveled concerning the creation of a self and how that self is realized by an interplay between spirit and nature Like his great predecessor Jos Ortega y Gasset and like his great Jewish contemporary Emmanuel Levinas Zubiri takes religion in all seriousness and locates its questions within the questions of modern philosophy In harmony with science he advances a new idea of becoming Reality not being becomes As reality s traits are revealed in different degrees reality resembles God the universal self giver Zubiri systematically touches on many disciplines to show the varieties of self giving throughout the universe of structural dynamism **The Living Age** ,1927 Encyclopedia of Giftedness, Creativity, and Talent Barbara Kerr,2009-06-17 The three volume Encyclopedia of Giftedness Creativity and Talent presents state of the art research and ready to use facts from the fields of education psychology sociology and the arts Philosophy Hans E.
