Sobiechowska, Richard Winter, 2013-03-07 This book explains and demonstrates how creative writing can be used successfully in the context of professional education where traditionally a more distanced approach to reporting on professional experience has been favoured. It is based on many practical examples drawn from several years' experience of running courses for social workers, nurses, teachers, managers and higher education staff in which participants explore their professional practice through imaginative forms of writing. The participants' experience of the work is presented through a discussion of interviews and evaluative documents. The book includes a set of distance learning materials for those wishing to undertake such work for themselves or to establish similar courses as well as a full analysis of the link between professional reflection and the artistic imagination. The book makes available a new and more broadly based approach to the process of professional reflection and the concept of the patchwork text has general relevance for debates about increasing access to higher education qualifications.

Great Books, Honors Programs, and Hidden Origins William Haarlow, 2003-12-16 This book argues a new and more complex interpretation of the development and manifestations of the liberal arts movement in American higher education during the 1930s, 40s and 50s. Specifically, the book elucidates the under-explored yet formative role that the University of Virginia and its 1935 Virginia Plan played both in fostering the liberal arts movement and as a representative institution of the broader interaction colleges and universities had with this movement.

Critical Essays on Charles Dickens's Great Expectations Michael Cotsell, 1990 Contemporary criticism of Dickens's famous novel is the focus of this collection which examines how feminism, psychoanalysis and the new historicism can be applied to *Great Expectations*. Essays from the turn of the century are included to give a perspective on later criticism. Extracts from Dickens's memoirs and a piece by John Forster cover the novel's genesis. The introduction considers the themes that have recurred in criticism of the novel: the relation of the individual to society, the influence of history on the individual and the complex psychology of the hero.

Macroeconomics ; Australasian Edition Olivier Blanchard, Jeffrey Sheen, 2013-05-30 Real current macroeconomic events connected to the theory. The new fourth edition of Blanchard's respected *Macroeconomics* text has been substantially revised to account for the impact of the GFC on the Australasian Economy and the many issues it raises. Thus, in addition to a first discussion of the crisis in Chapter 1 and numerous boxes and discussions throughout the book, we have brought forward the chapter on the GFC to Chapter 9. *Macroeconomics* is the only intermediate resource with a truly Australasian focus, demonstrating economic ideas and issues with hundreds of local and international examples. This comprehensive resource presents an integrated view of macroeconomics, drawing on the implications of equilibrium conditions in three sets of markets: the goods market, the financial markets and the labour market.
