The purpose of this paper is to think of a particular time in my childhood and apply Brothelness's five systems to that particular time. Brothelness's ecological theory in child development suggests that five levels of the environment simultaneously influence us as children. Brothelness believes that we cannot fully understand the phenomenon of continuity and bio-psychological characteristics of a child without considering how we are influenced by each level of our environment.

The most serious impact on my life occurred at the age of 10 years old, which I will be discussing in detail further on in this essay.

They were part of the long-term immediate environment in which I placed my trust, other temporary Microsystems that came and went are athletic clubs, boy scouts, and church, through those Microsystems I got a chance to build relationships, built various skills, and I also learned how to socialize through personal experience.

At about age 10 I developed a love for track and field and went on to win numerous medals in school which is a personal success story of mine. In this peri
