

COLOUR VARIATION

"A complimentary combo that has an intrinsically high-contrast when put together."

It's no accident that the IKEA logo is blue and yellow, these are colours that forms the Swedish flag.

Blue, a colour that paints the sky and sea, a hue that represents stability and trust. In heraldry, blue is used to symbolize piety and sincerity.

Yellow, a colour that depicts sunshine, a hue that renders happiness and joy. Yellow produces cheerful mentality, and arouses positivity.

In combination, we get a combo that evokes emotions of optimism, stability and trust.

Ikea Brand Guidelines:

Design by IKEA Sara Kristoffersson, 2014-10-23 Sara Kristoffersson's compelling study provides the first sustained critical history of IKEA. Kristoffersson argues that the company's commercial success has been founded on a neat alignment of the brand with a particular image of Swedish national identity, one that is bound up with ideas of social democracy and egalitarianism and its material expression in a pared-down functional design aesthetic. Employing slogans such as "Design for everyone" and "Democratic design," IKEA signals a rejection of the stuffy, the chintzy, and the traditional in both design practices and social structures. Drawing on original research in the IKEA company archive and interviews with IKEA personnel, *Design by IKEA* traces IKEA's symbolic connection to Sweden through its design output and its promotional materials to examine how the company both promoted and profited from the concept of Scandinavian Design.

The importance of values is also acknowledged in marketing, and companies use values to describe the core associations of their brand. Yet despite this, the values concept has received limited attention in marketing theory. *The Influence of Values on Consumer Behaviour* aims to bridge the gap between the conceptual progress of values in psychology and the current practice in marketing and branding literature. It proposes the Value Compass, a comprehensive value system that is cross-culturally applicable to consumer behaviour and brand choice. The values concept is used in psychology to identify the motivations underlying behaviour, a concept that marketers have borrowed to define brand values. This has led to conceptual confusion. Whereas in psychology the values system is perceived as an integrated structure, in marketing values are treated as abstract motivations that give importance to the benefits of consumption. Attention in marketing has shifted away from brand values toward brand personality, a set of human characteristics associated with a brand. Despite its popularity, brand personality has limitations in explaining consumer behaviour, while the potential merits of a brand values concept have remained largely unexplored. The book presents a meaningful alternative to the brand personality concept and promotes the benefits of using the Value Compass for assessing the effects of brand values and personal values on consumer choice. As such, it will be essential reading for academics and postgraduate students in the fields of marketing, consumer psychology, branding, consumer choice, behaviour and business studies. *Change Management Study Guide*, Welcome to the forefront of knowledge with Cybellium, your trusted partner in mastering the cutting edge.
