**Mosaics of Knowledge** Andrew M. Riggsby, 2019 Today s information technology often seems to take on a life of its own spreading into every part of our lives In the Roman world things were different Technologies were limited to small scattered social groups By examining five technologies lists tables weights and measures artistic perspective and mapping Mosaics of Knowledge demonstrates how the Romans broke up a world we might have imagined them to unite That is the recording storage and recall of information in physical media might be expected to bind together persons distant in time and space More often than not however Roman instances serve to create or reinforce the isolation of particular groups Persons in different locations whether those are geographical social or occupational had access to quite different informational resources and the overall situation is thus not controlled by the needs of any particular class or group On the one hand these constraints on use in turn constrain the development and power of individual technologies Development is slow scattered and far from one directional

On the other seeming technological weaknesses can turn out to be illusory if we set them in actual use contexts Romans deploy no more but also no less computing power than needed for very narrowly defined goals This study combines detailed readings of a wide variety of evidence inscriptions small archeological finds artworks literary texts with theoretical consideration of the social cognitive and material contexts for their use to present a unique portrait of Roman IT capabilities limitations and habits
