Imac G5 User Guide:

Mac User's Guide to Living Wirelessly Brad Miser, 2005 The major force driving people to embrace wireless computing is Wi-Fi. Once dismissed as a fad, Wi-Fi is rapidly becoming ubiquitous in the US and around the world. In 2004, more than half of all laptops sold in the US shipped with Wi-Fi installed. By 2007, most analysts predict that nearly every laptop sold in the US will include Wi-Fi. Nearly 20 million Wi-Fi access points will be sold this year, up 20% from last year. As these numbers grow, prices will continue to fall, making Wi-Fi more attractive to more and more people. By the end of this year, there will be more than 40,000 hotspots, public Wi-Fi access points available across the US in hotels, fast food restaurants, cafés, airports, even parks. By 2007, that number will surpass 100,000. From McDonald's to Kinko's to Holiday Inn, Wi-Fi is becoming a killer amenity. Once Wi-Fi networks are in place, they can be used for much more than just Internet access. For example, the AirPort Express allows users to stream iTunes throughout their homes wirelessly. Wi-Fi is being used to network printers, cameras, and ultimately home entertainment devices.

Designing for User Engagement on the Web Cheryl Geisler, 2013-08-15 Designing for User Engagement on the Web 10 Basic Principles is concerned with making user experience engaging. The cascade of social web applications we are now familiar with—blogs, consumer reviews, wikis, and social networking—are all engaging experiences. But engagement is an increasingly common goal in business and productivity environments as well. This book provides a foundation for all those seeking to design engaging user experiences rich in communication and interaction. Combining a handbook on basic principles with case studies, it provides readers with a rich understanding of engagement, extending a welcome setting the context, making a connection, sharing control, supporting interaction, creating a sense of place, and planning to continue the engagement. Based on research funded by the Society for Technical Communication, the case studies illustrate how designers build community in order to support education, connect kids to community resources, introduce users to other cultures, foster collaboration, encourage activism, and much more.
