Imagination is the Source of Creativity and Invention This series of essays has been collected expressly to bring readers new ideas about imagination and creativity in education that will both stimulate discussion and debate and also contribute practical ideas for how to infuse our daily classrooms with imaginative activities In a world that values creative innovation it is distressing that our schools are dominated by an educational paradigm that pays too little attention to engaging the imagination and emotions of students in the curriculum and the worlds challenges that the curriculum is designed to prepare students to meet The ability of children to think creatively to be innovative enterprising and capable depends greatly on providing a rich imagination based educational environment It is only when we consider the imagination a vital component of our lives and one of the great workhorses of learning that we recognize the importance of adding the imaginative to the study of the affective cognitive and physical modes of our development Doing so fills a gap that has led to incomplete accounts of childrens development their subsequent learning needs and indeed how to fulfill these needs in educational environments This discussion about the importance of imagination and creativity in education has been taken up by researchers and educators around the world It is represented here by writings from authors from Brazil Canada China Denmark Italy Israel Japan and Romania In the first part of this book these authors explore and discuss theories of development imagination and creativity In the second part they extend these theories to broader social issues such as responsible citizenship gender and special needs education to new approaches to curriculum subjects such as literacy science and mathematics and to the educational environment of the museum     **YC Young Children** ,2007     [Technologies for Children](#) Marilyn

Fleer,2023-07-10 Technologies for Children is a comprehensive guide to teaching design and digital technologies to children
