risks The process of introducing an implementation process for maritime regulations worldwide is described within this text An emphasis is put on the role of main stakeholders in the regulatory process and reasons that increase the willingness of stakeholders to participate in the implementation of regulations This book will be of interest to scholars and students interested in the management of the shipping industry as well as ship owners and managers who are charged with implementing maritime regulations *Serving the Rule of International Maritime Law* Norman A. Martínez

Gutiérrez,2009-12-16 International maritime law is far from inert everyday international affairs constantly test existing law and in many occasions require its development The collection contains innovative studies on current issues and events that are testing the present state of international maritime law The book is intended as a Festschrift to Professor David Attard and celebrates his career in international law This work represents a close collaboration amongst many practitioners and academics involved in the field of international maritime law including Judge Helmut Tuerk Francis Reynolds William Tetley Q C and Patrick J S Griggs **Cartner on the International Law of the Shipmaster** John A. C. Cartner,2022-07-07 This

unique book rethinks and rewrites the previous edition It categorises simply the nine interactive legal duties of the shipmaster analysing and relating them to laws and conventions within a single volume Cartner on the International Law of the Shipmaster contends that command depends on decision making and that shipmasters are not provided sufficient timely relevant and pertinent information for command decisions The book proposes voyage planning follow the spacecraft model of the USA s National Aeronautics and Space Administration providing readers with a metric for command It constructively criticises the conventions and management and is aimed at reducing catastrophes by focusing on the hitherto elusive human factor in the shipmaster Cartner proposes that command at sea be its own profession and discipline with those called to it specifically trained in its intricacies he argues that current ships are not designed to be command worthy or security worthy and that management should reorder its relationships with shipmasters as tactical managers afloat The insights the book provides are an invaluable aid to decision making for the modern civil commander and anyone association with this pivotal and essential profession This book is a necessary reference and guide for shipmasters technologists naval architects regulators underwriters students practitioners and courts of maritime law and command worldwide **JoC Week** ,2000
