concepts to children Shared book reading improves children s problem solving skills allows for an exchange of ideas establishes logical and may prompt discussion of abstract concepts This chapter reviews how children learn mathematics and research on the use of storybooks for mathematics skill development It concludes with examples of how explicit and implicit storybooks in either paper or digital versions may be used Keywords Storybooks mathematics children s learning of mathematics children s development Journal of International Students, 2019 Vol. 9 No. 1 Krishna Bista,Chris Glass,2018-12-31 The Journal of International Students JIS is a quarterly publication on international education JIS is an academic interdisciplinary and peer reviewed publication Print ISSN 2162 3104 Online ISSN 2166 3750 indexed in major academic databases The journal publishes scholarly peer reviewed articles on international students in tertiary education secondary education and other educational settings that make significant contributions to research policy and practice in the internationalization of education worldwide We encourage the submission of manuscripts from researchers and practitioners around the world from a myriad of academic fields and theoretical perspectives including international education comparative education human geography global studies linguistics psychology sociology communication international business economics social work cultural studies and other related disciplines *Past, Present, and Future Possibilities for Philosophy and History of Education* Stefan Ramaekers,Naomi Hodgson,2018-08-17 On the occasion of the retirement of Paul Smeyers this book considers the state and status of the philosophy and history of education today Over the last 20 years the conditions in which research takes place have changed considerably They have done so in ways that are often less than favourable to disciplines such as history and philosophy of education and the space and time for the practices that constitute these disciplines of reading of writing of collegiality is increasingly under pressure During this time the Research Community on the History and Philosophy of Educational Research has convened annually to bring its critical lenses to bear on these emergent conditions and to suggest ways that educational research might or ought to be done otherwise As co founder and co convenor of the Research Community this volume explores and recounts Paul Smeyers development of Wittgensteinian scholarship and its legacy in education his formative role in the development of philosophy of education as an international field his many international collaborations the useless educational philosophical deepening of concepts and the wider educational philosophical import of this This gives rise to consideration of the failure of these fields to halt the changes in the governance and status of the university that threatens them and those practices that remain and that are emerging in academia that we wish to protect to pass on to the next generation of researchers in these fields , **Education Abroad** Erin A. Mikulec,Samantha Potempa,Kara Pike Inman,2021-01-01 Education abroad is an essential part of the university student experience Initiatives such as IIE s Generation Study Abroad encourage more U S undergraduate and graduate students to study abroad According to the Open Doors 2019 Report by the Institute for International Education IIE 341 751 students participated in post secondary education abroad programs during the 2017 2018 academic year This figure

represents an increase of 2.7% of U.S. students studying abroad from the previous year. Research shows that education abroad provides students with opportunities not only to see the world but also to develop intercultural competence which is increasingly crucial in the 21st century workplace. There are also numerous studies that show gains in autonomy, confidence, and tolerance for ambiguity in students who complete some type of study abroad experience. In sum, the education abroad experience in itself represents a powerful learning environment that continues to support personal and professional development long after returning home. Nonetheless, these learning environments must be cultivated along with faculty who develop and lead programs as well as university partners and providers. Furthermore, education abroad programming and assessment is complex and must take into consideration many factors including academic goals, purposeful curricular development, and a balance between academics and leisure activities on site. This book explores the many aspects of education abroad as a learning environment such as student learning outcomes, faculty development, and program assessment and evaluation. In addition, several chapters present education abroad experiences as a model for community engagement and activism. The authors represent a diverse range of institutions and perspectives and discuss programs around the globe. The book represents the voices of faculty that lead education abroad programs, students who participate in them, and also those of international students on a U.S. campus reflecting on their personal experiences abroad. Furthermore, this book contributes to the discussion of best practices to assist faculty and program directors in creating robust education abroad programs that meet the needs of their students and institutions.

**Voicing the Silences of Social and Cognitive Justice**, 2017-01-01. *Voicing the Silences of Social and Cognitive Justice* (Dartmouth Dialogues) represents another transformative dialogue that results from a political project that was designed to prepare critical, transformative leaders, policy makers, and analysts in South Coast Massachusetts. In this volume, a diverse group of scholars debates crucial issues within and beyond our field in an effort to help develop a multiplicity of analyses dissecting the challenges facing a strong, epistemologically just theory and pedagogy of society. The volume explores why it has been historically difficult to produce a hegemonic critical theory and pedagogy of society. The volume also examines how social justice has been depoliticized from the cultural politics of everyday life through teacher-proof curricula that forces a segregated uniformity. It examines the multi-dimensional nature of language within relationships of power and discourses of

reproduction production and resistance unpacks how democracy has been challenged by an eugenic educational system dissects the impact of corporate models of education on learning processes examines how the use of zero tolerance policies in the U S s public schools has led to the criminalization of non violent acts within the nation s public schools thereby creating oppressed student populations unveils how alternative proficiency assessment is not a good measure of student progress and dissects the rationale behind standardized testing and its corresponding profits suggesting other motives for high stakes testing mandates In these challenging times Jo o Paraskeva and Elizabeth Janson s book lifted me up with its sharp theoretical and historical critique of education from elementary schools through doctoral programs Every chapter provided original critiques of the dominant neoliberal approach to organizing schools and society and provided ideas for how to challenge anti intellectualism and neoliberalism As a long time teacher of every level and subject I appreciated the empirical research and detailed narrative descriptions of programs and classes I know I will keep the book nearby as I reread chapters helping me to both expand my theoretical critique and critical practice A must read for all educators really committed with critical transformative leadership David Hursh Warner Graduate School of Education University of Rochester Rochester NY author of most recently The End of Public Schools The Corporate Reform Agenda to Privatize Education

**Practising Immanence** David A. G. Clarke,2023-11-28 Practising Immanence Living with Theory and Environmental Education makes creative contributions to both qualitative inquiry and environmental education by exploring how each of these ideas seep and fuse into one another creating a space where methodology becomes pedagogy and where each of these is already always environmental indivisible with life Clarke s energising and innovative approach offers a challenge to conventional research practices and shows ways in which inquiry can be done differently Drawing on new materialisms affect theory and the practical philosophy of Gilles Deleuze and Felix Guattari the book details the PhD journey of the author merging stories and theory and stories of theory in the production of eight haecceities a philosophical concept which prioritises the thisness of a thing or event This move allows a novel methodological approach whereby the haecceities act as sites of variation on the events of the book the self as unstable and posthuman the environment as everything immanent rather than as an overly romantic or a green version of nature and the tensions that these moves create for ethical orientations in education inquiry and life in the Anthropocene Practising Immanence brings theory to life through a diffractively critical style and a unique approach to environmental pedagogic practice This radical and vitalising book will be of interest to those inspired to explore environmental problems and inquiry with each other and to those drawn to creative relational narrative embodied and post qualitative approaches to research Noncognitive Skills and Their Influencing Factors for Children Jinyan Zhou,2021-12-19 Non cognitive skills are often used to refers to those skills that do not fall within the cognitive category but to describe a stable pattern of thought feeling and behavior in different situations and backgrounds with profitable and investable characteristics such as conscientiousness perseverance and teamwork which are

critically important in education However for many years non cognitive skills have always been ignored in human capital theory The book using a multidisciplinary approach tries to uncover the noncognitive components of human capital so as to answer the question what is the skill that should be invested in The author expands the connotations of human capital by exploring the value of noncognitive skills and their production patterns constructing a measurement framework and a set of tools to measure noncognitive skills She especially carries out an empirical survey which covers primary and secondary school students from seven provinces of China s east middle and west areas With the data collected she analyzes Chinese students noncognitive development and further identifies the critical factors that may impact their noncognitive skills by applying the Bayesian Model Average approach The book will be a theoretical contribution to education economics
