4 BPP Learning Media,2012-12-01 A Core Study Text for the ATT Qualification 2 BPP Learning Media,2012-12-01 A Core Study Text for the ATT Qualification International Taxation of Manufacturing and Distribution John Abrahamson,2016-02-18 The most thorough treatment of its subject available this book introduces and analyses the international tax issues relating to international manufacturing and distribution activities extending from the tax regime in the country where the manufacturing activities are located through to regional purchase and sales companies to the taxation of local country sales companies The analysis includes the domestic tax laws relating to manufacturing and distribution company profits as well as international tax issues relating to income flows and the payment of dividends Among the topics and issues analysed in depth are the following foreign tax credits taxation in the digital economy tax incentives intellectual property group treasury companies mergers and acquisitions leasing derivatives controlled foreign corporation provisions VAT and customs tariffs free trade agreements and customs unions transfer pricing role of tax treaties hedging related accounting issues deferred tax assets and liabilities tax risk management supply chain management depreciation allowances and carry forward tax losses The book includes descriptions of 21 country tax systems and ten detailed case studies applying the analysis to specific examples Detailed up to date attention is paid to the OECD Action Plan on Base Erosion and Profit Shifting BEPS and other measures against tax avoidance As a full scale commentary and analysis of international taxation issues for multinational manufacturing groups including in depth consideration of corporate structures tax treaties transfer pricing and current developments this book is without peer It will prove of inestimable value to all accountants lawyers economists financial managers and government officials working in international trade environments **Tax Law, State-Building and the Constitution** Dominic de Cogan,2020-08-06 This monograph looks at how tax is intertwined with constitutional law and the state in the UK It looks at a variety of topics including tax devolution scrutiny and reform of tax legislation the protection of taxpayers and the domestic legal processing of international rules and problems Tax Law State Building and the Constitution presents and interrogates five key claims First there is a clear overlap between the concerns of tax and constitutional lawyers Secondly the tax system is being deeply affected by the fast pace of constitutional change Thirdly decisions taken in the tax field are likely to have a reverse influence on the evolution of the constitution Fourthly these relationships are heavily context dependent with tax making all the difference to some ongoing constitutional controversies whilst having very little to do with others Fifthly by acknowledging tax as an important moving part within the contemporary constitution we might understand both tax and constitutional law a little better The book therefore contributes to deeper theoretical debates on the identity of tax law as a discipline the relevance of tax to public lawyers the meaning of state building in the recent history of a developed country and the importance of public finances to a wider sense of what is going on These are questions that ought to command the attention of tax and constitutional law academics as well as policy

makers and reformers Runner up of the 2022 SLS Peter Birks Prize for Outstanding Legal Scholarship **Fundamentals of Transfer Pricing** Michael Lang, Giammarco Cotani, Raffaele Petruzzi, 2021-06-18 Transfer pricing is one of the most relevant and challenging topics in international taxation Over the last century nearly every country in the world introduced transfer pricing rules into their domestic legislation Indeed it was estimated that profit shifting generated by the improper application of transfer pricing rules has resulted in global tax losses worth USD 500 billion for governments 20% of all corporate tax revenues It is thus imperative that all tax professionals thoroughly understand the nature of transfer pricing and how the growing body of applicable rules works in practice In this crucially significant volume stakeholders from government multinational companies international organisations advisory groups and academia offer deeply informed perspectives both general and specific on the practical application of transfer pricing rules taking into consideration all the most recent developments With approximately 160 practical examples and 90 relevant international judicial precedents the presentation proceeds from general to more specialised topics Such aspects of the subject as the following are thoroughly analysed what is transfer pricing and the purpose of transfer pricing rules the arm's length principle and its application the consequences of a transaction not being in accordance with the arm's length principle the transfer pricing methods the mechanisms to avoid and resolve disputes the transfer pricing documentation the attribution of profits to permanent establishments the transfer pricing aspects of specific transactions such as services financing intangibles and business restructurings The application of transfer pricing legislation is arguably the most difficult task that taxpayers and tax authorities around the world must face With this authoritative source of practical guidance government officials tax lawyers in house tax counsel academics advisory firms the business community and other stakeholders worldwide will have all the detail they need to move forward in tackling this thorny aspect of the current tax environment Non-discrimination and Trade in Services Catherine A. Brown, 2017-05-02 This book argues that the proliferation of global trade and the increasing power of free trade arrangements leave income taxes as one of the few remaining measures that can potentially be used for protectionist purposes It analyzes the interaction between the non discrimination principles in tax treaties and trade related agreements including multilateral WTO regional NAFTA AANZTA and bilateral free trade agreements The absence of a non discrimination obligation with respect to tax measures that apply to non resident service providers and to non resident services may therefore significantly undermine trade obligations The book clearly reveals how these tax barriers to trade may unfairly or unnecessarily restrict trade in services and puts forward a new more effective non discrimination obligation in tax matters to be included in tax treaties one that would more closely parallel the non discrimination obligations in trade agreements The book examines the concept of non discrimination in tax matters from several perspectives specifically a North American and Australian perspective as well as a perspective based on EU and UK law focusing on the interaction between these legal systems bilateral tax treaties regional trade agreements and where relevant the General Agreement on

Trade in Services GATS The book explores the possibility of a reciprocal influence between tax treaties and trade agreements and poses the question as to whether tax treaties might do more in providing a non discrimination principle in the cross border trade in services div CJEU Case Law in Direct Taxation: Territoriality and Fundamental Freedoms Stephanie

Zolles,2023-07-13 The principle of territoriality and the fundamental freedoms The tension between the fundamental freedoms and the sovereignty of the Member States is omnipresent in the CJEU s case law on direct taxation A significant number of cases concerned one of the core principles in national tax laws the principle of territoriality Although this principle is continuously mentioned in cases concerning the compatibility of direct tax measures with the fundamental freedoms the case law seems to provoke more questions than answers This book provides guidance on the meaning of territoriality in the CJEU s case law on direct taxation as well as on the role which this principle plays in the compatibility of domestic direct tax measures with the fundamental freedoms During a critical and dogmatically oriented journey through the CJEU s case law the reader can enjoy a comprehensive analysis containing references to more than 300 cases Without a doubt this timeless reflection of the tension between the principle of territoriality and the fundamental freedoms is not only interesting from a dogmatic perspective but also from a tax policy one **Working the Federal Budget** George D.
