Chia,2015-04-07 This book explores the role of education in the formation of the Singapore developmental state The book provides a historical study of citizenship education in Singapore whereby a comparative study of history civics and social studies curricula and the politics and policies that underpin them are examined 2013 Syllabus Singapore. Curriculum Planning & Development Division,2012 **Decolonizing Philosophies of Education** Ali A. Abdi,2012-01-01 Philosophy of education basically deals with learning issues that attempt to explain or answer what we describe as the major questions of its domains i e what education is needed why such education and how would societies undertake and achieve such learning possibilities In different temporal and spatial intersections of people s lives the design as well as the outcome of such learning program were almost entirely indigenously produced but later they became perforce responsive to externally imposed demands where as far as the history and the actualities of colonized populations were concerned a cluster of de philosophizing and de epistemologizing educational systems were imposed upon them Such realities of colonial education were not conducive to inclusive social well being hence the need to ascertain and analyze new possibilities of decolonizing philosophies of education which this edited volume selectively aims to achieve The book should serve as a necessary entry point for a possible re routing of contemporary learning systems that are mostly of de culturing and de historicizing genre With that in mind the recommendations contained in the 12 chapters should herald the potential of decolonizing philosophies of education as liberating learning and livelihood praxes This collection of critical and scholarly analyses provides an insightful and timely resource for decolonizing philosophies of education that continue to shape discourses policies curricula and practices in all levels of educational and social institutions It also usefully challenges versions of postcolonial studies that fail to recognize and demystify the continuity of colonial hegemony in contemporary societal formations in both the global north and south Toh Swee Hin Distinguished Professor University for Peace Costa Rica Laureate UNESCO Prize for Peace Education 2000 Decolonizing philosophies of education edited by Ali A Abdi is a collection of twelve essays by noted scholars in the field who provide strong readings of postcolonialism in education with an emphasis on decolonizing epistemologies It provides a clear and comprehensive introduction to the critical history of colonization postcolonial studies and the significance of education to the colonial project This is an important book that provides a global perspective on the existential and epistemological escape from the colonial condition Michael A Peters Professor Educational Policy Studies University of Illinois at Urbana Champaign Teaching Chemistry Around the World Björn Risch,2010 As teachers we often tend to expect other countries to teach chemistry in much the same way as we do but educational systems differ widely At Bielefeld University we started a project to analyse the approach to chemical education in different countries from all over the world Teaching Chemistry around the World 25 countries have participated in the project The resulting country studies are presented in this book This book may be seen as a contribution to make the structure of chemistry

teaching in numerous countries more transparent and to facilitate communication between these countries Especially in the case of the school subject chemistry which is very unpopular on the one hand and occupies an exceptional position on the other hand due to its relevance to jobs and everyday life and most notably due to its importance for innovation capacity and problem solving we have to learn from each others educational systems The World of Science Education ,2010-01-01 Each volume in the 7 volume series The World of Science Education reviews research in a key region of the world These regions include North America South and Latin America Asia Australia and New Zealand Europe and Israel Arab States and Sub Saharan Africa The focus of this Handbook is on science education in Asia and the scholarship that most closely supports this program The reviews of the research situate what has been accomplished within a given field in an Asian rather than an international context The purpose therefore is to articulate and exhibit regional networks and trends that produced specific forms of science education The thrust lies in identifying the roots of research programs and sketching trajectories focusing the changing face of problems and solutions within regional contexts The approach allows readers to review what has been done and accomplished what is missing and what might be done next

Mathematics Curriculum in School Education
 Yeping Li, Glenda Lappan, 2013-11-19 Mathematics curriculum which is often a focus in education reforms has not received extensive research attention until recently Ongoing mathematics curriculum changes in many education systems call for further research and sharing of effective curriculum policies and practices that can help lead to the improvement of school education This book provides a unique international perspective on diverse curriculum issues and practices in different education systems offering a comprehensive picture of various stages along curriculum transformation from the intended to the achieved and showing how curriculum changes in various stages contribute to mathematics teaching and learning in different educational systems and cultural contexts The book is organized to help readers learn not only from reading individual chapters but also from reading across chapters and sections to explore broader themes including Identifying what is important in mathematics for teaching and learning in different education systems Understanding mathematics curriculum and its changes that are valued over time in different education systems Identifying and analyzing effective curriculum practices Probing effective infrastructure for curriculum development and implementation Mathematics Curriculum in School Education brings new insights into curriculum policies and practices to the international community of mathematics education with 29 chapters and four section prefaces contributed by 56 scholars from 14 different education systems This rich collection is indispensable reading for mathematics educators researchers curriculum developers and graduate students interested in learning about recent curriculum development research and practices in different education systems It will help readers to reflect on curriculum policies and practices in their own education systems and also inspire them to identify and further explore new areas of curriculum research for improving mathematics teaching and learning
