

LRIT system architecture

The ship operator's obligation under the LRIT regulation is to ensure provision of compliant equipment to transmit the identity of the ship, the position and date and time of the position to the Data Centre nominated by the Flag Administration / Ship Registry. In addition, the transceiver must be able to respond to polling for an on-demand position report and be able to immediately respond to instructions to modify the automatic reporting interval to a frequency of a maximum of once every 15 minutes. Automatic Position Reports will be transmitted at a minimum four times per day to your Flag's National Data Centre.

Why test with Pole Star?

We understand the LRIT system and what is required. We attend and contribute to the relevant IMO COMSAR, NAV, MSC, Engineering and Working Group meetings. We work with all the major satellite equipment manufacturers, communications service providers, land earth station operators, Inmarsat and other satellite communication network providers to ensure that the LRIT system works end-to-end. Pole Star is an LRIT Data Centre Administrator and an Authorised Testing ASP for over 90 Flags. See www.lrit.com for the latest information.

Pole Star's system manages all aspects of the test, including: terminal commissioning, satellite communications network management, post-test de-commissioning, production of a detailed test result and provision of a conformance test certificate if required. Testing of shipborne Inmarsat C equipment began in July 2008 and we have conducted over 25,000 tests since then.

Our technical capability is backed up by a professional, multi-lingual customer support team with offices in both Hong Kong and the United Kingdom. Ship operators who test their LRIT transceivers with Pole Star will also be offered a free trial of our commercial Fleet Management product.

Why test now?

The vessel shows its compliance to the regulation by having on board a valid CTR, issued on behalf of their flag, in accordance with the provisions of MSC.1/Circ.1307 on Guidance on the survey and certification of compliance of ships with the requirement to transmit LRIT information.

A vessel must show compliance by the date of its first survey after 31 December 2008 or at change of flag (considered the first survey after 31 December 2008).

Although a number of Flag States are still to implement their operational LRIT Data Centre as required by Regulation V/19-1, in order to prevent Port State Controls from penalizing ships of these flags, the IMO's Maritime Safety Committee approved transitional arrangements for the compliance of vessels.

This means that as long as the vessel has complied with its LRIT obligation (provided a tested and certified transceiver in advance of the radio survey date) within the deadline, it cannot be sanctioned for matters outside its control. With this in mind, ship operators are advised to test their transceivers in good time.

The Interception of Vessels on the High Seas Efthymios Papastavridis,2014-08-28 The principal aim of this book is to address the international legal questions arising from the right of visit on the high seas in the twenty first century This right is considered the most significant exception to the fundamental principle of the freedom of the high seas the freedom in peacetime to remain free of interference by ships of another flag It is this freedom that has been challenged by a recent significant increase in interceptions to counter the threats of international terrorism and WMD proliferation or to suppress transnational organised crime at sea particularly the trafficking of narcotics and smuggling of migrants The author questions whether the principle of non interference has been so significantly curtailed as to have lost its relevance in the

contemporary legal order of the oceans The book begins with an historical and theoretical examination of the framework underlying interception This historical survey informs the remainder of the work which then looks at the legal framework of the right of visit contemporary challenges to the traditional right interference on the high seas for the maintenance of international peace and security interferences to maintain the bon usage of the oceans navigation and fishing piracy j ure gentium and current counter piracy operations off the coast of Somalia the problems posed by illegal unregulated and unreported fishing interdiction operations to counter drug and people trafficking and recent interception operations in the Mediterranean Sea organised by FRONTEX
