9700 BIOLOGY

9700/34

Paper 34 (Advanced Practical Skills 2),
maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2014 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

Political Institutions and Practical Wisdom Maxwell A. Cameron,2018-06-19 Societies create rules that govern our practices Such rules can only be effective however if the intermediaries between rules and practices institutions harness the skill knowledge and motivation of practitioners Yet everywhere institutions seem to be failing Over reliance on rules and incentives has not only corrupted the intrinsic motivations that arise from practice it has also promoted the spread of competitive utility maximizing and thereby discouraged the kind of moral agency necessary for institutions to work well In Political Institutions and Practical Wisdom Maxwell Cameron takes this basic insight as his starting point to argue that the rapid spread of the tenets of a neoliberal political economic philosophy in our era has contributed to the erosion of institutional capacity The book contributes to an emerging field of social science research grounded in the Aristotelian idea of phronesis or practical wisdom Drawing on a wide range of examples Cameron not only shows how good institutions depend on wise practitioners he argues that contemporary democratic institutions are being assaulted by excessive partisanship and the hollowing out of democratic deliberation by the corrupting effects of money in politics and by the use of neoliberal techniques of governance that are designed to foster competition rather than the pursuit of common goods At once a valuable guide to designing effective institutions and a trenchant critique of contemporary institutional failure Political Institutions and Practical Wisdom promises to reshape our understanding of one of the most basic building blocks of contemporary social and political life
