Seymour, Michael P Mortell, 2017-01-18 This unique book aims to treat a class of nonlinear waves that are reflected from the boundaries of media of finite extent It involves both standing unforced waves and resonant oscillations due to external periodic forcing The waves are both hyperbolic and dispersive To achieve this aim the book develops the necessary understanding of linear waves and the mathematical techniques of nonlinear waves before dealing with nonlinear waves in bounded media The examples used come mainly from gas dynamics water waves and viscoelastic waves Engineering

Mechanics, Dynamics, Study Guide J. L. Meriam, L. G. Kraige, 1997-03-21 This concise and authoritative book emphasizes basic principles and problem formulation It illustrates both the cohesiveness of the relatively few fundamental ideas in this area and the great variety of problems these ideas solve All of the problems address principles and procedures inherent in the design and analysis of engineering structures and mechanical systems with many of the problems referring explicitly to design considerations **Next Generation Energetics** Jacqueline Akhavan, 2025-07-18 Held for the second time in the UK

the international conference in explosives and other energetics took place in June 2024 These conferences host international academics and practitioners who share and showcase research undertaken in this area Particularly important is the part the UK plays as one of the world leaders in this area with the opportunity to provide unclassified and novel research This book contains the proceedings of this meeting and comprises unique peer reviewed papers which are highly desirable for researchers in this field Divided into two sections on synthesis characterisation and diagnostics and artificial intelligence simulation and modelling the book captures the fundamental science of explosives and energetic materials that underpins deeper understanding of explosives propellants pyrotechnics and gas generators All professionals from early careers through to subject matter experts will find topics of interest in this snapshot of research
