Merseyside At War:

Merseyside at War 1939-45 Mike Royden, 2019-02 Merseyside played a unique role during the Second World War which directly led to the area being a major enemy target in an attempt to put the port completely out of action. Consequently Merseyside became the most heavily bombed area outside of the capital. Despite the considerable damage the campaign failed and the port continued as a centre of operations for Western Approaches Command controlling the safe passage of supply convoys into the Mersey providing an essential lifeline to the success of the war effort. Rare insights into the life of war-torn Merseyside are included along with untold stories from those who witnessed the events first hand including the Blitz, the defense of the port and the grim conditions in one of the largest prisoner of war and internment camps in the country in Huyton. A broad spectrum of life on the Home Front is recounted through memories, newspaper stories and personal memoirs to bear witness to the profound trials of courage and fortitude of ordinary people enduring this desperate struggle to survive the war years. This fraught resilience was not always a united front and controversial topics are also studied such as conscientious objectors, racism, strike action and crime plus the issue of the Spirit of the Blitz: was it a myth or reality? This book therefore is an attempt to cover the full period of the war on the Home Front in all its aspects from the day war was declared to the wild celebrations on the streets at the cessation of hostilities plus the immediate post-war problems.

over the English countryside Hough and Richards offer a history that is at once deep and wide ranging They offer insight into how the British laid the groundwork for victory through aircraft research and production the development and implementation of command and control structures and research into new technologies the most important of which was radar Hough and Richards also utilize first person accounts of the battle whenever possible rendering the battle scenes with cinematic intensity A compelling introduction to one of the most important battles of World War II The Battle of Britain pays tribute to the men about whom Winston Churchill would remark Never in the field of human conflict was so much owed by so many to so few

Class, Culture and Community Anne Baldwin, Chris Ellis, 2012-11-15 In recent years historians have debated fervently on the reason for the decline of British Labour History as an academic discipline Most certainly the challenge of Thatcherism to the working classes and trade unions in the 1980s and the fragmentation of Labour history into gender studies industrial studies and women s history have contributed to its apparent decline Post modernists challenges to the concept of class culture and community have done their damage As a result Labour history in its broad school sense has been taught less and less in British universities Yet it survives and there are grounds for believing that it will revive This collection of chapters arose from a conference held at the University of Huddersfield in November 2010 held under the auspices of the Society for the Study of Labour History where nineteen papers were presented Ten of this disparate array of papers form the basis of this collection The theme of community and localised struggle form the first section ranging as it does from the newspapers representation of Yorkshire miners to brass bands and the development of separate culture The second section deals with the more traditional trade unionism and varieties of industrial struggle The third section focuses upon the political aspects of working class activity drawing upon the role of women and Labour policy on steel nationalisation and defence The fourth deals with radicalism ranging from the failure of Chartism the policy of working class organisations to emigration and the failure of the soft section of the British left in the 1920s and 1930s There is no all embracing concept here for what is a varied collection of chapters However what can be said is that British Labour history continues to provide new areas for research Indeed its death as an academic discipline has been greatly exaggerated This collection of book chapters represents the current revival in Labour history which has emerged in a form that brings together community and culture alongside class and political representation to explore the breadth and depth of working class identity
