Kourtis, 2025-02-05 This book delves into the complexities of genocide as a legal concept offering a fresh perspective by exploring the rights of groups to exist under international criminal law It presents an in depth analysis of group rights challenging traditional interpretations within the context of the Genocide Convention By focusing on the conceptual and practical implications of recognizing groups as rights holders this work introduces a nuanced understanding of collective rights and their enforcement What sets this approach apart is its thorough examination of both the theoretical foundations and the operational aspects of international law concerning genocide The book provides a critical assessment of various legal theories addressing how these can be reconciled with the dynamic nature of international human rights practices It also highlights the potential for these theoretical frameworks to impact the protection of vulnerable groups on a global scale The scope of this work is broad yet detailed encompassing an analysis that will be invaluable for legal practitioners scholars and policymakers It systematically addresses the ambiguities and challenges in defining and prosecuting genocide offering strategic insights into the enhancement of legal frameworks to prevent such atrocities The book incorporates primary archival research that brings to light new evidence on the drafting of the Genocide Convention including cases such as that of the Greek children which have previously been underexplored The primary audience for the work includes academics and students in the fields of international law international criminal law criminal law human rights and genocide studies as well as diplomats policy makers legal professionals historians sociologists anthropologists philosophers specializing in genocide and genocide scholars in general The insights provided will be crucial for anyone committed to advancing the understanding and implementation of international law protecting group rights Dimitrios Kourtis holds a PhD and is a Post doctoral Researcher and Teaching Fellow in the Department of International Studies at the Faculty of Law of the Aristotle University in Thessaloniki Greece

**Meeting the Challenges to Measurement in an Era of Accountability** Henry Braun, 2016-01-29 Under pressure and support from the federal

government states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves. The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4-8. Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district. Comparatively little has been written about the measurement of achievement in the other grades and subjects. This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all. It addresses traditional end of course tests as well as alternative measures such as portfolios, exhibitions and student learning objectives. In each case issues related to design and development, psychometric considerations and validity challenges are covered from both a generic and a content specific perspective. The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment. Edited by leading experts, these books are comprehensive and practical resources on the latest developments in the field. The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license.

*Serving Library Users from Asia* John Hickok, 2019-06-12 Asian populations are among some of the fastest growing cultural groups in the US. While books on serving other target groups in libraries have been published e.g. disabled, Latino seniors etc. few books on serving library users of Asian heritage have been written. Thus the timely need for this book. Rather than a generalized overview of Asians as a whole, this book has 24 separate chapters each on 24 specific Asian countries, cultures of East, Southeast and South Asia with a wealth of resources for understanding, interacting with, outreaching to and serving library users of each culture. Resources include cultural guides, both print and online, language helps with sample library vocabulary, Asian booksellers nationwide, cultural groups, professional literature and more. Resources and suggestions are given for all three types of libraries: public, school and academic, making this book valuable for all librarians. The demographics of each Asian culture, numbers and distribution plus history of immigration and international student enrollment is also featured. As a bonus, each chapter spotlights a US public school and academic library providing model outreach to Asian library users. Additionally, this book provides a detailed description and analysis of libraries in each of the 24 Asian countries. The history, development, facilities, conditions, technology, classification systems and more of public, school and academic libraries are all discussed with detailed documentation. Country conditions influencing libraries and library use are also described, literacy levels, reading cultures, languages and writing systems, educational systems and more. Based on the author's 15 years of research and travels to Asia, this work is a must-have for all librarians.

**International Business Ethics** Stephan Rothlin, Dennis McCann, 2015-07-29 This book addresses an essential need felt by many who seek to promote best business practices in China and East Asia, namely the need for culturally appropriate instructional materials.

basic information case studies and ethical perspectives that will allow managers and entrepreneurs to understand and embrace the challenge of moral leadership in business In an era characterized by globalization and the increasing importance of the economies of China India Japan and SE Asia international business ethics must reflect the concerns of the people living and working in this area the moral and spiritual traditions that have nurtured them and their specific contributions to sustainable development This book presents twenty important case studies taken from newsworthy events of the past few years in which Asians and others have attempted to respond to this challenge Each case study has been selected and shaped in order to highlight various aspects of doing business in Asia starting with basic principles and moving on to the specific responsibilities that businesses have towards their various stakeholders The authors contend that the best way to appreciate the relevance of Asian moral and spiritual traditions is to determine their specific contribution to virtue ethics where the ancient traditions of both East and West converge in their focus on the qualities of moral leadership that form the basis of best business practice Exploring the case studies will enable readers to appreciate the continued relevance of these ethical perspectives in Asian business Best business practice clearly involves learning to do business and playing the game according to the rules but the necessity of playing by the rules is not likely to become clear until one takes up the path that leads to a virtuous life in business developing a moral character chiefly based on integrity
