

Florida Geometry EOC Assessment Study Guide

The Florida Geometry End-of-Course Assessment is computer-based. During testing students will have access to the Algebra I/Geometry EOC Assessment Reference Sheet (at the end of this document) and a scientific calculator. View the [Florida Geometry Practice Test](#) for additional information. The exam will be given on two 90 minute sessions for a total duration of 180 minutes. It will contain 30-35 multiple choice items and 20-25 gridded response items. 1/3 (33%) of the test questions will be low complexity items, 50% (50%) will be moderate complexity items, and 1/3 (33%) will be high complexity items. In addition, 25% of the exam questions will come from Two-Dimensional Geometry, 20% from Three-Dimensional Geometry, and 15% from Figurative Geometry and Discrete Mathematics. Students in Geometry and Geometry Honors will be required to take the Geometry End-of-Course Assessment which is based on the regular Geometry Course Course Code: 12082100.

Meeting the Challenges to Measurement in an Era of Accountability Henry Braun, 2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4 8 Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district Comparatively little has been written about the measurement of achievement in the other grades and subjects This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all It addresses traditional end of course tests as well as alternative measures such as portfolios exhibitions and student learning objectives In each case issues related to design and development psychometric considerations and validity challenges are covered from both a generic and a content specific perspective The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment Edited by leading experts these books are comprehensive and practical resources on the latest developments in the field The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
