Miller, Andrew U. Frank, Michael F. Gooch, 2006-09-21 This book constitutes the refereed proceedings of the 4th International Conference on Geographic Information Science GIScience 2006 The book presents 26 revised full papers Among traditional topics addressed are spatial representations and data structures spatial and temporal reasoning computational geometry spatial analysis and databases Many papers deal with navigation interoperability dynamic modeling ontology and semantics Geosensors location privacy social issues and GI research networks rank among the new directions covered *Proof and Other Dilemmas* Bonnie Gold, Roger A. Simons, 2008 During the first 75 years of the twentieth century almost all work in the philosophy of mathematics concerned foundational questions In the last quarter of the century philosophers of mathematics began to return to basic questions concerning the philosophy of mathematics such as what is the nature of mathematical knowledge and of mathematical objects and how is mathematics related to science Two new schools of philosophy of mathematics social constructivism and structuralism were added to the four traditional views formalism intuitionism logicism and platonism The advent of the computer led to proofs and the development of mathematics assisted by computer and to questions of the role of the computer in mathematics This book of 16 essays all written specifically for this volume is the first to explore this range of new developments in a language accessible to mathematicians Approximately half the essays were written by mathematicians and consider questions that philosophers are not yet discussing The other half written by philosophers of mathematics summarize the discussion in that community during the last 35 years In each case a connection is made to issues relevant to the teaching of mathematics *Spatial Context*

Christopher Gold,2018-04-17 Many disciplines are concerned with manipulating geometric or spatial objects in the computer such as geology cartography computer aided design CAD etc and each of these have developed their own data structures and techniques often independently Nevertheless in many cases the object types and the spatial queries are similar and this book attempts to find a common theme *Person-environment-behavior Research* Douglas Amedeo,Reginald G. Golledge,Robert

John Stimson,2009-01-01 Research into spatial influences on people s everyday activities and experiences presents many conceptual and methodological complexities Written by leading authorities this book provides a comprehensive framework for collecting and analyzing reliable person environment behavior data in real world settings that rarely resemble the controlled conditions described in typical texts An array of research designs are illustrated in chapter length examples addressing such compelling issues as spatial patterns of voting behavior ways in which disabilities affect people s travel and wayfinding how natural and built environments evoke emotional responses spatial factors in elementary teaching and learning and more A special chapter guides the student or beginning researcher to craft a successful research proposal
