Jim Collins posits that most American entities, from the federal government and multi-national corporations all the way down to individuals, are hindered by being good and thus not rising to being great. That good is the enemy of great is not just a business problem, he writes. It is a human problem.

16 As such, the question naturally arises: Can a good enough government

company organization or person become a great one If so is there a discrete methodology that might consistently yield a transformation from good to great Or is the disease of just being good incurable 5 To answer this question Collins and his team executed a massive research project spanning five years and totaling a combined 15 000 hours of research for its twenty one person team Rather than beginning with a hypothesis and drilling down for confirmation or falsification Collins and his team started by collecting coding and analyzing raw data and existing writing and research From there they worked their way up to a set of core practices among organizations that move from good to great ultimately working up a linear roadmap any organization can follow to make such a transformation
