Floods in the Ganga-Brahmaputra-Meghna Delta Aznarul Islam, Pravat Kumar Shit, Dilip Kumar Datta, M. Shahidul Islam, Suwendu Roy, Sandipan Ghosh, Balai Chandra Das, 2023-02-14 This volume covers the floods of the major rivers of the Ganga Brahmaputra Meghna GBM Delta and storm surge related coastal floods in these regions. The book is dedicated to addressing floods from an integrated physical social perspective to provide students and researchers with a holistic understanding of floods in terms of both human and geomorphological aspects. The systematic coverage of all the major rivers and coastal areas in the GBM delta and surrounding regions will foster a clear comprehension of this dense reservoir of population where thousands of people are impacted every year due to flood hazards and agricultural destabilization. This comprehensive treatment of flood issues in the region covers flash floods, fluvial floods, fluvio tidal floods and coastal floods and outlines flood management strategies to maintain ecological integrity and environmental stability and prevent harmful impacts of future floods. The book is intended for students and researchers in earth and environmental sciences especially geomorphology, hydrology, geography, geology, natural resources management and regional planning.

The New Whole Duty of Man, 1780 *The Path to Mechanized Shoe Production in the United States* Ross Thomson, 2018-08-25 In 1800 shoes in the United States were made by craftsmen each trained to create an entire shoe. A century later shoes were mass produced in factories employing dozens of machines and specialized workers. Ross Thomson describes this transition from craft to mechanized production in one of the largest American industries of the nineteenth century. Early shoe machinery originated through innovations made by shoemakers, tailors and especially machinists. It continued to evolve through a process of learning by selling in which sales of one generation of machines led to technological learning and ongoing invention by those who used, serviced and sold them. As a result of this process the mechanization of the shoe industry and the manufacturers of the machinery it used including such firms as Singer and United Shoe Machinery evolved together. In researching the process of industrialization Thomson examined nearly 8 000 patents. Comparing the patent information with directories for more than eighty American cities he was able to find out who the inventors were, who employed them, how many patents they held and the extent to which their inventions were used.
