Ghosts of the Somme Jonathan Evershed,2018-05-30 Once assumed to be a driver or even cause of conflict commemoration during Ireland s Decade of Centenaries came to occupy a central place in peacebuilding efforts The inclusive and cross communal reorientation of commemoration particularly of the First World War has been widely heralded as signifying new forms of reconciliation and a greater maturity in relationships between Ireland and the UK and between Unionists and Nationalists in Northern Ireland In this study Jonathan Evershed interrogates the particular and implicitly political claims about the nature of history memory and commemoration that define and sustain these assertions and explores some of the hidden and countervailing transcripts that underwrite and disrupt them Drawing on two years of ethnographic fieldwork conducted in Belfast Evershed explores Ulster Loyalist commemoration of the Battle of the Somme its conflicted politics and its confrontation with official commemorative discourse and practice during the Decade of Centenaries He investigates how and why the myriad social political cultural and economic changes that have defined postconflict Northern Ireland have been experienced by Loyalists as a culture war and how commemoration is the means by which they confront and challenge the

perceived erosion of their identity He reveals the ways in which this brings Loyalists into conflict not only with the politics of Irish Nationalism but with the peacebuilding state and crucially with each other He demonstrates how commemoration works to reproduce the intracommunal conflicts that it claims to have overcome and interrogates its nuanced and perhaps

counterintuitive function in conflict transformation **Educational Policy Borrowing in China** Charlene Tan,2016-02-22

Sectarianism in Iraq Khalil Osman, 2014-10-10 This book links sectarianism in Iraq to the failure of the modern nation state to resolve tensions between sectarian identities and concepts of unified statehood and uniform citizenry After a theoretical excursus that recasts the notion of primordial identity as a socially constructed reality the author sets out to explain the persistence of sectarian affiliations in Iraq since its creation following the dismemberment of the Ottoman Empire Despite the adoption of homogenizing state policies the uneven sectarian composition of the ruling elites nurtured feelings of political exclusion among marginalized sectarian groups the Shicites before 2003 and the Sunnis in the post 2003 period The book then examines how communal discourses in the educational curriculum provoked masked forms of resistance that sharpened

sectarian consciousness Tracing how the anti Persian streak in the nation state s Pan Arab ideology which camouflaged anti Shicism undermined Iraq s national integration project Sectarianism in Iraq delves into the country s slide from a totalizing Pan Arab ideology in the pre 2003 period toward the atomistic impulse of the federalist debate in the post 2003 period Employing extensive fieldwork this book sheds light on the dynamics of political life in post Saddam Iraq and is essential reading for Iraqi and Middle East specialists as well as those interested in understanding the current heightening of sectarian Sunni Shicite tensions in the Middle East *Saturday Review* ,1863 [The Future of English in Asia](#) Michael O'Sullivan,David Huddart,Carmen Lee,2015-10-05 This collection is unique in bringing together key thinkers on language and literature to discuss the future of English in Asia Many of the contributors are themselves responsible for important sub genres in English linguistics and literary studies and this collection gives them the opportunity to respond to each other directly The different chapters also respond to different contemporary debates and emerging trends and discourses that are hugely important for the future of English language teaching in schools across Asia This volume is also ground breaking in bringing English literary studies and Applied English Linguistics together in the contemporary Asian context The Future of English in Asia includes studies on the following subject areas Cultural Translation in World Englishes Multilingual Education English Futures and the function of Literature English Literary Studies in Japan and English and Social Media in Asia Well into this century it appears that it is still very difficult to know what to expect when it comes to the future of English The future of English will continue to be determined by complex local contexts As it has in other parts of the world the future of English in Asia will continue to rely on the proliferation of its transformations as much as its hegemonic status This volume reflects the widespread acknowledgement that whatever future English has will inevitably be shaped by its fate in Asia The collection will be a welcome resource for scholars and students of English linguistics English literary studies and topics related to the teaching of English in Asia *Boredom Studies Reader* Michael E. Gardiner,Julian Jason Haladyn,2016-10-04 Boredom Studies is an increasingly rich and vital area of contemporary research that examines the experience of boredom as an importan even quintessential condition of modern life This anthology of newly commissioned essays focuses on the historical and theoretical potential of this modern condition connecting boredom studies with parallel discourses such as affect theory and highlighting possible avenues of future research Spanning sociology history art philosophy and cultural studies the book considers boredom as a mass response to the atrophy of experience characteristic of a highly mechanised and urbanised social life **African Immigrant Families in Another France** L. Bass,2014-09-25 Immigrant incorporation is a critical challenge for France and other European societies today Black Africans migrants are racialized and endowed with an immigrant status which carries low status and is durable into the second generation This book elucidates the conflict and issues pertinent to social integration **The Hindu Nation** MK Raghvendra,2021-03-18 The Hindu Nation begins with an introduction examining nationhood in India and then traces the political conflict to Nehruvian cultural policy after 1947 In

today's world no religion can claim to be superior to any other. But in pursuing modernity and inculcating the scientific and secular outlook, Nehruvian rationalism created an elite liberal class that was sceptical about the majority religion, but this was not extended to other religions because of a misunderstanding of secularism. In promoting Westernised education, the preservation of local knowledge was neglected, and Hinduism lost respect among the educated elite born into it. The elite class became the intermediary with the West, which now dominates the academic study of India. Further prompted by the sceptical attitude of many liberal Indians, Western academics and intellectuals accord Hinduism less respect compared to other religions and treat it as superstition. Traditional Indians who revere Hinduism but are products of the same lopsided system respond by attributing false value to India's prehistory and its past. Hinduism is not a religion but a collection of practices associated with the space now called India. Author M. K. Raghavendra examines what being a Hindu means and asks whether its practices are reconcilable with global modernity and compatible with justice and egalitarianism. While examining the obstacles a modern Hindu nation faces, including the fixed ways of a large public, this extensively researched book also suggests measures to make India successful as a global power and Hinduism widely respected. *First-Year Composition*
