**The Intellectual Sword** Bruce A. Kimball, Daniel R. Coquillette, 2020-05-26 A history of Harvard Law School in the twentieth century focusing on the school's precipitous decline prior to 1945 and its dramatic postwar resurgence amid national crises and internal discord By the late nineteenth century Harvard Law School had transformed legal education and become the preeminent professional school in the nation But in the early 1900s HLS came to the brink of financial failure and lagged its peers in scholarly innovation It also honed an aggressive intellectual culture famously described by Learned Hand In the universe of truth they lived by the sword They asked no quarter of absolutes and they gave none After World War II however HLS roared back In this magisterial study Bruce Kimball and Daniel Coquillette chronicle the school's near collapse and dramatic resurgence across the twentieth century The school's struggles resulted in part from a debilitating cycle of tuition dependence which deepened through the 1940s as well as the suicides of two deans and the dalliance of another with the Nazi regime HLS stubbornly resisted the admission of women Jews and African Americans and fell behind the trend toward legal realism But in the postwar years under Dean Erwin Griswold the school's resurgence began and Harvard Law would produce such major political and legal figures as Chief Justice John Roberts Justice Elena Kagan and President Barack Obama Even so the school faced severe crises arising from the civil rights movement the Vietnam War Critical Legal Studies and its failure to enroll and retain people of color and women including Justice Ruth Bader Ginsburg Based on hitherto unavailable sources including oral histories personal letters diaries and financial records The Intellectual Sword paints a compelling portrait of the law school widely considered the most influential in the world

that China should become a great maritime power and secondly that the PLA become a world class armed force by 2050 He wants this latter objective to be largely completed by 2035 China as a Twenty First Century Naval Power focuses on China's navy and how it is being transformed to satisfy the world class goal Beginning with an exploration of why China is seeking to become such a major maritime power author Michael McDevitt first explores the strategic rationale behind Xi's two objectives China's reliance on foreign trade and overseas interests such as China's Belt and Road strategy In turn this has created concerns within the senior levels of China's military about the vulnerability of its overseas interests and maritime life lines is a major theme McDevitt dubs this China's sea lane anxiety and traces how this has required the PLA Navy to evolve from a near seas focused navy to one that has global reach a blue water navy He details how quickly this transformation has taken place thanks to a patient step by step approach and abundant funding The more than 10 years of anti piracy patrols in the far reaches of the Indian Ocean has acted as a learning curve accelerator to blue water status McDevitt then explores the PLA Navy's role in the South China Sea and the Indian Ocean He provides a detailed assessment of what the PLAN will be expected to do if Beijing chooses to attack Taiwan potentially triggering combat with America's first responders in East Asia especially the U S Seventh Fleet and U S Fifth Air Force He conducts a close exploration of how the PLA Navy fits into China's campaign plan aimed at keeping reinforcing U S forces at arm's length what the Pentagon calls anti access and area denial A2 AD if war has broken out over Taiwan or because of attacks on U S allies and friends that live in the shadow of China McDevitt does not know how Xi defines world class but the evidence from the past 15 years of building a blue water force has already made the PLA Navy the second largest globally capable navy in the world This book concludes with a forecast of what Xi's vision of a world class navy might look like in the next fifteen years when the 2035 deadline is reached

century British working class culture      *A Question of Worth* Chris Steed, 2016-09-14 We live in a world that has become a resource a world conditioned by the progressive domination of a monetary scale applied across the board Our value and worth are contingent upon what we earn on what we own Amidst the increasing financialisation that characterises much of the globe the prevailing ethos is that the only values we can usefully measure are those that can be quantified and expressed in terms of economics Yet economic value and the value of the human are closely connected erode the economic and you erode the personal In the global economic crash of recent years it has been people who have been under assault not just financial value The vulnerability of a society shaped solely by economic and monetised transactions is exposed when the economy and the monetisation of everything fails When the economic machine seizes up it is people who are devalued and dumped Drawing upon his experience in government education and the Church the author asks Must we be a market society as well as a market economy Can we devise a non economic account of describing human value and worth Christopher Steed argues that the really important issues that frame the contemporary human situation are those that cannot be measured Quality is also vital to human flourishing what after all is wealth for In this timely and important work the author calls for a wider concept of value one that encompasses both economic value and human value and for a society that cultivates the importance of the human

**Anatomy Museum** Elizabeth Hallam, 2016-06-15 The wild success of the traveling Body Worlds exhibition is testimony to the powerful allure that human bodies can have when opened up for display in gallery spaces But while anatomy museums have shown their visitors much about bodies they themselves are something of an obscure phenomenon with their incredible technological developments and complex uses of visual images and the flesh itself remaining largely under researched This book investigates anatomy museums in Western settings revealing how they have operated in the often passionate pursuit of knowledge that inspires both fascination and fear Elizabeth Hallam explores these museums past and present showing how they display the human body whether naked stripped of skin completely dissected or rendered in the form of drawings three dimensional models x rays or films She identifies within anatomy museums a diverse array of related issues from the representation of deceased bodies in art to the aesthetics of science from body donation to techniques for preserving corpses and ritualized practices for disposing of the dead Probing these matters through in depth study Anatomy Museum unearths a strange and compelling cultural history of the spaces human bodies are made to occupy when displayed after death
