QuickView LED Display

The multi-color LEDs help you determine the status of your zoning system quickly without removing the cover on the zoning panel.

The PDM is used to select vacation mode, display the contractor's and manufacturer's name and telephone number, error messages and the panel status.

1. The NEXT key is used to navigate through the menu.
2. Momentarily pressing the MENU key displays the first User menu selection.
3. The CANCEL can be used to exit the display menu.
4. Pressing the SAVE key is used to turn the vacation mode on or off.
5. No (N) key is used to navigate through the menu selections or turn the Vacation mode off.

Vacation or Vacant mode can be used when the building or home is going to be vacant for a period of time. The Zone1 thermostat will now control all the zones and the HVAC equipment. Change the Zone1 thermostat to Hold mode if it is a programmable thermostat and set energy efficient heating and cooling temperatures.

The vacation or vacant mode can be controlled by the PDM on the panel or by an SW01 Occupied/Vacant switch if it is installed. The SW01 will override the PDM vacation/vacant mode selection.
