new content including regular content summaries more knowledge check questions and synoptic links Increase student confidence in understanding and explaining key economic issues with relevant examples and information in context

British Humanities Index, 2008 **The UK Economy in a Global Context** Colin Grahame Bamford, Susan Grant, 2000 This series is written around key areas of economics and business studies Each individual title reflects headings in exam board specifications to enable students to know which books to buy The books include data and diagrams which aim to offer comprehensive facts on each subject **Environmental Economics** David Burningham, John Davies, 2004 Environmental Economics is about the contribution economics can make to solving environmental problems and about the questions raised over choice and efficiency in the use of limited resources Modern World History for AQA Specification B. Tony Hewitt, Jane Shuter, 2001 This student book is a foundation edition for the syllabus specific texts for GCSE Modern World History for AQA and provides simplified versions of the core textbooks It is aimed at students who are expected to gain C to G grades **Modern World History for AQA Specification B**. Ferriby McCabe, David Ferriby, 2002-08 This series is targeted at AQA Modern World History specification B It provides all the information students will need for paper one and paper two with exam style questions to help them prepare for the exam proper Differentiated resources in Core and Foundation editions mean the series can be used with all students whatever their individual ability This revision guide concentrates on improving the students grades by summarizing key issues and highlighting practical issues concerning exam performance **GCSE English for AQA B** John Law, David Stone, 2002 Matching the AQA B specification this text aims to help students develop the skills needed for the AQA B GCSE English exam It includes exam practice questions with guidance on how to answer them **Mathematical Modelling** C Haines, P Galbraith, W Blum, S Khan, 2007-08-01 This book continues the ICTMA tradition of influencing teaching and learning in the application of mathematical modelling Each chapter shows how real life problems can be discussed during university lectures in school classrooms and industrial research International experts contribute their knowledge and experience by providing analysis insight and comment whilst tackling large and complex problems by applying mathematical modelling This book covers the proceedings from the Twelfth International Conference on the Teaching of Mathematical Modelling and Applications Covers the proceedings from the Twelfth International Conference on the Teaching of Mathematical Modelling and Applications Continues the ICTMA tradition of influencing teaching and learning in the application of mathematical modelling Shows how real life problems can be discussed during university lectures in school classrooms and industrial research **UK Current Economic Policy** David Smith, Susan Grant, 2003 This series is written around key areas of economics and business studies Each individual title reflects headings in exam board specifications to enable students to know which books to buy The books include data and diagrams which aim to offer comprehensive facts on each subject **Reign of Error** Diane Ravitch, 2013-09-17 From one of the foremost authorities on education in the United States former U S assistant secretary of education whistle blower

extraordinaire The Wall Street Journal author of the best selling The Death and Life of the Great American School System Important and riveting Library Journal The Language Police Impassioned Fiercely argued Every bit as alarming as it is illuminating The New York Times and other notable books on education history and policy an incisive comprehensive look at today s American school system that argues against those who claim it is broken and beyond repair an impassioned but reasoned call to stop the privatization movement that is draining students and funding from our public schools In Reign of Error Diane Ravitch argues that the crisis in American education is not a crisis of academic achievement but a concerted effort to destroy public schools in this country She makes clear that contrary to the claims being made public school test scores and graduation rates are the highest they ve ever been and dropout rates are at their lowest point She argues that federal programs such as George W Bush s No Child Left Behind and Barack Obama s Race to the Top set unreasonable targets for American students punish schools and result in teachers being fired if their students underperform unfairly branding those educators as failures She warns that major foundations individual billionaires and Wall Street hedge fund managers are encouraging the privatization of public education some for idealistic reasons others for profit Many who work with equity funds are eyeing public education as an emerging market for investors Reign of Error begins where The Death and Life of the Great American School System left off providing a deeper argument against privatization and for public education and in a chapter by chapter breakdown putting forth a plan for what can be done to preserve and improve it She makes clear what is right about U S education how policy makers are failing to address the root causes of educational failure and how we can fix it For Ravitch public school education is about knowledge about learning about developing character and about creating citizens for our society It s about helping to inspire independent thinkers not just honing job skills or preparing people for college Public school education is essential to our democracy and its aim since the founding of this country has been to educate citizens who will help carry democracy into the future

Secondary Maths in Action Emma McCrea,2025-07-11 In Secondary Maths in Action experienced curriculum expert and maths teacher Emma McCrea offers insights into the complex task of teaching maths Taking an evidence informed stance Emma first explores the age old question of why we study maths and the important role it plays in our lives and in society Next she examines several pertinent debates in maths those of pupil grouping mastery and gender Finally we are taken on a grand tour of curriculum pedagogy and assessment as the fundamental pillars of great teaching Additionally the book includes four rich case studies revisited throughout the curriculum pedagogy and assessment chapters which help to showcase how these ideas can be applied in various contexts so you can really see what it all looks like In Action
