Research Methods Melanie Nind, Daniel Kilburn, Rebekah Luff, 2018-03-08 The importance of the teaching and learning of social research methods is increasingly recognised by research councils and policy bodies as crucial to the drive to increase capacity amongst the research community The need for greater scholarly engagement with how research methods are taught and learnt is also driven by the realisation that epistemological and methodological developments have not been

accompanied by a pedagogical literature or culture Training initiatives need this pedagogic input if they are to realise the educational aspirations for methodologically skilled and competent researchers able to apply adapt and reflect on a range of high level research methods and approaches The contributors to this collection have fully engaged with this need to develop and share pedagogical knowledge in relation to the teaching of research methods Together they span qualitative quantitative and mixed methods a range of disciplinary and national contexts and face to face and blended teaching and learning Through detailed examples the collection addresses how best teaching practices develop in response to distinctive challenges that will resonate with readers in so doing it will inspire and inform their own development This book was originally published as a special issue of the International Journal of Social Research Methodology

Banks, Exchanges, and Regulators Ranald C. Michie, 2020-11-26 Never have financial markets been subjected to a period of change as rapid and extensive as took place from the 1970s onwards In the 1970s global financial markets were controlled by governments compartmentalized along national boundaries and segregated according to the particular activities they engaged in This all disintegrated in the decades that followed under the pressure of market forces global integration and a revolution in the technology of trading One product of this transformation was the Global Financial Crisis of 2008 which exposed the fragility of the new structures created and cast a long shadow that we still live in today The response to that crisis has shaped the global financial system which has been tested once again by the coronavirus pandemic However none of the outcomes of this transformation were inevitable despite the forces at work They were the product of decisions taken at the time for a multitude of reasons Banks exchanges and regulators were faced with unprecedented challenges and opportunities as a revolution swept away traditional ways of conducting banking the methods used to trade in financial markets and the rules and regulations employed to enforce discipline In this book Ranald C Michie provides an authoritative and unrivalled account of this upheaval based on a careful and exhaustive reading of the Financial Times over the last four decades using it to provide a source of material unmatched by any other in terms of depth and coverage By studying what happened and why in real time it is possible to explain the decisions taken that shaped the course of the transformation and its repercussions

diverse roles in maintaining linear historicist models of time law's participation in the materialisation of times and the unsteady effects of temporal pluralism and polytemporalities in law De naturalising the time in law and time scholarship this collection positions time as something that can be enacted and materialised as well as experienced with distinct implications for questions of social justice The Introduction and Chapter 6 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Corporate Governance and Investment Management Roger M. Barker, Iris H.-Y. Chiu, 2017-12-29
Shareholder engagement with publicly listed companies is often seen as a key means to monitor corporate malpractices In this book the authors examine the corporate governance roles of key institutional investors in UK corporate equity including pension funds insurance companies collective investment funds hedge and private equity funds and sovereign wealth funds They argue that institutions corporate governance roles are an instrument ultimately shaped by private interests and market forces as well as law and regulatory obligations and that policy makers should not readily make assumptions regarding their effectiveness or their alignment with public interest or social good

All That Is Solid Danny Dorling, 2014-02-19
Housing was at the heart of the financial collapse and our economy is now precariously reliant on the housing market In this groundbreaking new book Danny Dorling argues that housing is the defining issue of our times Tracing how we got to our current crisis and how housing has come to reflect class and wealth in Britain All That Is Solid radically shows that the solution to our problems rising homelessness a generation priced out of home ownership is not as is widely assumed building more homes Inequality he argues is what we really need to overcome

REACH Beyond Borders Ondřej Filipec, 2017-08-23
This book discusses how much other countries reflect the EU chemical regulation REACH Registration Evaluation Authorization Restriction of Chemicals in the context of Europeanization theory The main hypothesis verified in this book is that more trade with the EU means more Europeanization as the non EU companies exporting to the EU have an obligation to comply with EU rules according to the No data No Market REACH provision This book further points out that non EU companies voluntarily adopt EU standards while this change has yet to be reflected on the policy level in non EU countries mainly for economic reasons Exploring changes in national chemical regulatory policies among top chemical producers around the World brings new ideas into the process of Europeanization behind EU borders and provides useful material for academia regulatory experts and export oriented chemical industry

The Aqua Group Guide to Procurement, Tendering and Contract Administration Mark Hackett, Gary Statham, 2017-05-02
This key text for the building team is an authoritative guide and gives a detailed account of the team's roles and responsibilities with best industry practice required to ensure that building projects meet clients expectations on time cost and quality The second edition of The Aqua Group Guide to Procurement Tendering and Contract Administration has been edited enlarged and updated by a high profile author team with unparalleled experience of both private and public sectors as well as of teaching on QS courses

It covers the entire building process from inception to final account and throughout the emphasis is on current best practice. This edition has new material on the CDM regulations JCT contracts the RIBA Plan of Work the RICS New Rules of Measurement BIM and Sustainability as well as a general update for industry changes especially on procurement internationalisation and PFI. With clear and thorough explanations you are taken through self contained chapters covering the detail of the briefing stage procurement methods tendering procedures and contract administration. The period from starting a college course to successful completion of professional examinations represents a long and steep learning curve. The range of skills and the knowledge required to perform work efficiently and effectively might at first seem rather daunting. Although designed as an introductory textbook for undergraduates in construction architecture and quantity surveying, The Aqua Group Guide offers an excellent overview of contract administration and will provide you with sufficient understanding to hold you in good stead for your early years in professional practice.

Climate Change Mark Maslin, 2014. In the new edition of *Climate Change: A Very Short Introduction* previously titled *Global Warming*, Mark Maslin explores all of the key debates. Data Protection on the Move Serge Gutwirth, Ronald Leenes, Paul De Hert, 2016-01-09. This volume brings together papers that offer methodologies, conceptual analyses, highlight issues, propose solutions, and discuss practices regarding privacy and data protection. It is one of the results of the eighth annual International Conference on Computers, Privacy, and Data Protection (CPDP 2015) held in Brussels in January 2015. The book explores core concepts, rights, and values in upcoming data protection regulation and their adequacy in view of developments such as Big and Open Data, including the right to be forgotten, metadata, and anonymity. It discusses privacy-promoting methods and tools such as formal systems modeling methodology, privacy by design in various forms, robotics, anonymous payment, the opportunities and burdens of privacy self-management, the differentiating role privacy can play in innovation. The book also discusses EU policies with respect to Big and Open Data and provides advice to policy makers regarding these topics. Also, attention is being paid to regulation and its effects, for instance in case of the so-called EU cookie law and groundbreaking cases such as *Europe v Facebook*. This interdisciplinary book was written during what may turn out to be the final stages of the process of the fundamental revision of the current EU data protection law by the Data Protection Package proposed by the European Commission. It discusses open issues and daring and prospective approaches. It will serve as an insightful resource for readers with an interest in privacy and data protection.

A Revised Consent Model for the Transplantation of Face and Upper Limbs: Covenant Consent James L. Benedict, 2017-04-25. This book supports the emerging field of vascularized composite allotransplantation (VCA) for face and upper limb transplants by providing a revised ethically appropriate consent model which takes into account what is actually required of facial and upper extremity transplant recipients. In place of consent as permission, giving, waiver, or autonomous authorization, the standard approaches, this book

imagines consent as an ongoing mutual commitment i.e. as covenant consent. The covenant consent model highlights the need for a durable personal relationship between the patient subject and the care provider/researcher. Such a relationship is crucial given the recovery period of 5 years or more for VCA recipients. The case for covenant consent is made by first examining the field of vascularized composite allotransplantation, the history and present understandings of consent in health care and the history and use of the covenant concept from its origins through its applications to health care ethics today. This book explains how standard approaches to consent are inadequate in light of the particular features of facial and upper limb transplantation. In contrast, use of the covenant concept creates a consent model that is more appropriate ethically for these very complex surgeries and long-term recoveries.

Law and Corporate Behaviour Christopher Hodges, 2015-10-22. This book examines the theories and practice of how to control corporate behaviour through legal techniques. The principal theories examined are deterrence, economic rational acting, responsive regulation, and the findings of behavioural psychology. Leading examples of the various approaches are given in order to illustrate the models: private enforcement of law through litigation in the USA; public enforcement of competition law by the European Commission; and the recent reform of policies on public enforcement of regulatory law in the United Kingdom. Noting that behavioural psychology has as yet had only limited application in legal and regulatory theory, the book then analyses various European regulatory structures where behavioural techniques can be seen or could be applied. Sectors examined include financial services, civil aviation, pharmaceuticals, and workplace health safety. Key findings are that enforcement has to focus on identifying the causes of non-compliance so as to be able to support improved performance rather than be based on fear-motivating complete compliance. Systems in which reporting is essential for safety only function with a no-blame culture. The book concludes by proposing an holistic model for maximising compliance within large organisations, combining public regulatory and criminal controls with internal corporate systems and external influences by stakeholders held together by a unified core of ethical principles. Hence the book proposes a new theory of ethical regulation. This title is included in Bloomsbury Professional's International Arbitration online service.
