Despite prioritization by successive governments targeted reforms shaped by international development actors and featuring prominently in Chinese Belt and Road investments the Pakistani power sector continues to stifle economic and social life across the country. Why In Access to Power Ijlal Naqvi explores state capacity in Pakistan by following the material infrastructure of electricity across the provinces and down into cities and homes. Naqvi argues that the national level challenges of crippling budgetary constraints and power shortages directly result from conscious strategic decisions that are integral to Pakistan's infrastructural state. As he shows electricity governance in Pakistan reinforces unequal relations of power between provinces and the federal center contributes to the marginalization of subordinate groups in the city and cements the patronage based relationships between Pakistani citizens and the state that have been so detrimental to development progress. Looking through the lens of the electrical power sector Access to Power reveals how Pakistan actually works and to whose benefit.

Rahemtulla, Rainer Rohdewohld, 2022-10-12 Since its adoption in 2015 the 2030 Agenda on Sustainable Development has shaped not only international development cooperation but also the design of national trajectories for social and economic development. In tandem with other global agendas adopted that year such as the Paris Agreement on Climate Change and UN Habitat's New Urban Agenda it remains the global and regional blueprint for sustainable development despite the COVID 19 pandemic. The term localizing the Sustainable Development Goals (SDGs) has been used to capture the importance of subnational governments for achieving national SDG agendas. However there is little deeper analysis of the required nexus between fiscal political and legal arrangements for SNGs their involvement in national policy arenas which discuss and decide on national SDG strategies and the need for locally disaggregated data systems on the one hand and effective SDG localization strategies on the other hand. It is this aspect which the present publication explores in greater detail by using country examples and conceptual analyses.
