International Negotiation and Mediation in Violent Conflict Chester A. Crocker, Fen Osler Hampson, Pamela Aall, 2018-02-06 This collection of essays situates the study and practice of international mediation and peaceful settlement of disputes within a changing global context The book is organized around issues of concern to practitioners including the broader regional global and institutional context of mediation and how this broader environment shapes the opportunities and prospects for successful mediation A major theme is complexity and how the complex contemporary context presents serious challenges to mediation This environment describes a world where great power rivalries and politics are coming back into play and international and regional organizations are playing different roles and facing different kinds of constraints in the peaceful settlement of disputes The first section discusses the changing international environment for conflict management and reflects on some of the challenges that this changing environment raises for addressing conflict Part II focuses on the consequences of bringing new actors into third party engagement and examines what may be harbingers for how we will attempt to resolve conflict in the future The third section turns to the world of practice and discusses mediation statecraft and how to employ it in this current international environment The volume aims to situate the practice and study of mediation within this wider social and political context to better understand the opportunities and constraints of mediation in today s world The value of the book lies in its focus on complex and serious issues that challenge both mediators and scholars This volume will be of much interest to students practitioners and policymakers in the area of international negotiation mediation conflict resolution and international relations

Observing Conflict Escalation in World Society Richard Bösch, 2023-10-16 How do conflicts escalate This is one of the major questions in conflict research To offer further answers Richard B sch follows a tripartite agenda First he develops a constructivist methodology for the study of conflict escalation embedded in a Luhmannian systems theoretical world society perspective B sch argues that conflicts can be observed as social systems and he looks at the process of conflict escalation by analysing

communication Second this analysis offers two case studies the Maidan protests in Ukraine 2013 2014 and Mali's crisis 2010 2012 Third it gives insights on how systems theoretical research can be beneficial for Peace and Conflict Studies

The Catholic Case against War David Carroll Cochran, 2024-03-01 The Catholic Case against War demonstrates how the Catholic mantra Never again war reflects a set of powerfully realistic teachings on war and peace Over the last five decades the Catholic Church has emerged as a powerful critic of war and as an advocate for its alternatives At the same time researchers of armed conflict have produced a considerable body of scholarship on war and its prevention The Catholic Case against War compares these seemingly disparate lines of thought and finds a remarkable harmony between the two Drawing on years of Vatican documents and papal statements political scientist David Carroll Cochran clearly presents the key elements of the Church's case against war Far from a naive optimistic call for peace these teachings are consistent with the empirical research on the realities of contemporary warfare The result is a look not only at the explicit moral case against war developed by the Vatican but also at its remarkable realism and relevance to world conflict today

The Art of War in an Age of Peace Michael O'Hanlon, 2021-05-25 An informed modern plan for post 2020 American foreign policy that avoids the opposing dangers of retrenchment and overextension Russia and China are both believed to have grand strategies detailed sets of national security goals backed by means and plans to pursue them In the United States policy makers have tried to articulate similar concepts but have failed to reach a widespread consensus since the Cold War ended While the United States has been the world's prominent superpower for over a generation much American thinking has oscillated between the extremes of isolationist agendas versus interventionist and overly assertive ones Drawing on historical precedents and weighing issues such as Russia's resurgence China's great rise North Korea's nuclear machinations and Middle East turmoil Michael O'Hanlon presents a well researched ethically sound and politically viable vision for American national security policy He also proposes complementing the Pentagon's set of 4 1 pre existing threats with a new 4 1 biological nuclear digital climatic and internal dangers
