Merigó, Carlo Francesco Morabito, 2017-10-31 This book presents an authoritative collection of contributions reporting on fuzzy logic and decision theory together with applications and case studies in economics and management science Dedicated to Professor Jaume Gil Aluja in recognition of his pioneering work the book reports on theories methods and new challenges thus offering not only a timely reference guide but also a source of new ideas and inspirations for graduate students and researchers alike

Microeconomics of Banking, second edition Xavier Freixas, Jean-Charles Rochet, 2008-03-14 The second edition of an essential text on the microeconomic foundations of banking surveys the latest research in banking theory with new material that covers recent developments in the field Over the last thirty years a new paradigm in banking theory has overturned economists traditional vision of the banking sector The asymmetric information model extremely powerful in many areas of economic theory has proven useful in banking theory both for explaining the role of banks in the economy and for pointing out structural weaknesses in the banking sector that may justify government intervention In the past banking courses in most doctoral programs in economics business or finance focused either on management or monetary issues and their macroeconomic consequences a microeconomic theory of banking did not exist because the Arrow Debreu general equilibrium model of complete contingent markets the standard reference at the time was unable to explain the role of banks in the economy This text provides students with a guide to the microeconomic theory of banking that has emerged since then examining the main issues and offering the necessary tools for understanding how they have been modeled This second edition covers the recent dramatic developments in academic research on the microeconomics of banking with a focus on four important topics the theory of two sided markets and its implications for the payment card industry non price competition and its effect on the competition stability tradeoff and the entry of new banks the transmission of monetary policy and the effect on the functioning of the credit market of capital requirements for banks and the theoretical foundations of banking regulation which have been clarified although recent developments in risk modeling have not yet led to a significant parallel development of economic modeling Praise for the first edition The book is a major contribution to the literature on the theory of banking and intermediation It brings together and synthesizes a broad range of material in an

accessible way I recommend it to all serious scholars and students of the subject The authors are to be congratulated on a superb achievement Franklin Allen Nippon Life Professor of Finance and Economics Wharton School University of Pennsylvania This book provides the first comprehensive treatment of the microeconomics of banking It gives an impressive synthesis of an enormous body of research developed over the last twenty years It is clearly written and a pleasure to read What I found particularly useful is the great effort that Xavier Freixas and Jean Charles Rochet have taken to systematically integrate the theory of financial intermediation into classical microeconomics and finance theory This book is likely to become essential reading for all graduate students in economics business and finance Patrick Bolton Barbara and David Zalaznick Professor of Business Columbia University Graduate School of Business The authors have provided an extremely thorough and up to date survey of microeconomic theories of financial intermediation This work manages to be both rigorous and pleasant to read Such a book was long overdue and should be required reading for anybody interested in the economics of banking and finance Mathias Dewatripont Professor of Economics ECARES Universit

International Bibliography of Economics 1998 Compiled by the British Library of Political and Economic Science, 1999-12-16 Renowned for its international coverage and rigorous selection procedures this series provides the most comprehensive and scholarly bibliographic service available in the social sciences Arranged by topic and indexed by author subject and place name each

bibliography lists and annotates the most important works published in its field during the year of 1997 including hard to locate journal articles Each volume also includes a complete list of the periodicals consulted *From Economics to Political Economy* Tim B. Thornton,2016-07-22 The discipline of economics has been increasingly criticized for its inability to illuminate the workings of the real world and to provide reliable policy guidance for the major economic and social challenges of our time A central problem in contemporary economics and a problem from which many of its other failings flow is its lack of plurality By a lack of plurality it is meant that contemporary economics lacks diversity in its methods theories epistemology and methodology It is also meant that economics has become far less interdisciplinary From Economics to Political Economy offers an explanation as to why economics has become so determinedly non pluralistic and also gives considerable attention to exploring and evaluating promising strategies for reform These strategies include developing a pluralist economics under the label of political economy within other social science departments such as departments of politics Along the way the reader will learn about the worldwide student movement seeking greater pluralism in economics encounter some dramatic case studies in intellectual suppression gain a fuller sense of the nature of contemporary economics and explore the relationship between economics and other social sciences This book is of interest to any social scientist particularly those with interests in economics and politics Capitalism Anwar Shaikh,2016 In Capitalism Anwar Shaikh demonstrates that most of the central propositions of economic analysis can be derived without any reference to hyperrationality optimization perfect competition perfect information representative agents or so called rational expectations These include the laws of demand and supply the determination of wage and profit rates technological change relative prices interest rates bond and equity prices exchange rates terms and balance of trade growth unemployment inflation and long booms culminating in recurrent general crises **Remaking the Wealth of the Nations** Md Shamsul A. Chowdhury,2018-07-23 This book has found out the reasons as to why the wealth of nations differ from each other Why the GDP per capita of Canada and the U S were 43 248 5 and 56 115 7 respectively in 2015 whereas Mexico was languishing at 9 005 despite sharing common borders Why is the per capita of Malawi not identical to Luxembourg or USA Why the mountains of macro and micro economic studies failed to grow the economy up to expectation Have the theories of capitalism and communism dissipated into thin air Should the world think about an alternative option or formula for a better economy Remaking the Wealth of the Nations has carried out extensive research on different economies economic theories ideas and found out the common causes of economic successes and failures of the economies Finally this book has given out appropriate solution through clearly defining and explaining a new formula of Artificial Productivity to help the economists leaders and policy makers to remake the economies Promotion of Green Electricity in Germany and Turkey Onur Cagdas Artantas,2023-10-31 The global energy economy is undergoing a profound transformation yielding several pivotal objectives Foremost among these is mitigating greenhouse gas emissions and toxic pollutants Another essential goal involves promoting

more sustainable economies thereby curbing material consumption and reducing our reliance on resource extraction Further priorities include fostering energy security and economic resilience by reducing dependence on external energy sources All these aims overlap in one common policy accelerating the renewable energy capacity deployment Complementing this paradigm shift is the complete electrification of economic activities and households resulting in the need to incentivize green electricity generation In this context this book undertakes a comprehensive exploration of the regulatory framework underpinning the advancement of green electricity After reviewing the political and economic dimensions it offers an exhaustive analysis of ongoing developments in four legal domains The WTO EU Germany and Turkey Furthermore the book presents a legal analysis of the intricate interplay between the WTO and EU law coupled with the German and Turkish models It focuses on the most topical and relevant issues including the effect of the ongoing energy crisis on state aid for green electricity in the EU WTO case law on local content requirement components of the promotion schemes the intricate legal economic and political challenges that accompany Germany s Energiewende and its phasing out of coal and nuclear energy and Turkey s regulatory endeavors to bolster its energy self sufficiency strategy Following a thorough examination encompassing theoretical regulatory and comparative aspects the book moves beyond the applicable legal framework to make concrete proposals on the future design of green electricity promotion in Germany and Turkey so as to facilitate a rapid but socially equitable energy transition by incentivizing economic efficiency
