God, Grades, and Graduation Ilana M. Horwitz, 2022 This book tells a story about the surprising ways in which a religious upbringing shapes the academic pathways for teens of different gender and class backgrounds It shows how the attitudes and outlook of Christian teens who organize their life around their belief in God carries over to the academic realm On the one hand religious teens especially working class boys earn better grades and complete more years of college than their non religious peers On the other hand middle upper class teens especially girls wind up choosing to attend less selective colleges than their peers with similar grades *Crisis in Higher Education* Mark A. Vonderembse, 2017-10-24 While many students parents educators and organizations who hire their graduates hold US universities in high regard the cost of higher education has risen much faster

than the rate of inflation High costs in turn have severely limited access to higher education for large portions of the US population or caused graduates and those who fall short of graduation to face substantial student loan debt This book examines the root causes of these underlying problems and offers a comprehensive easy to understand high impact solution The book identifies actions that improve higher education outcomes including lower tuition costs better access for student from low and middle income homes faster throughput fewer dropouts and better job opportunities for graduates It links a real and implementable solution to the underlying problems and their root causes Upon finishing this book readers should understand why the performance of higher education needs to improve and have solid ideas about how to fix it The book focuses on public universities but the ideas discussed are also applicable to private for profit and not for profit universities The writing style is simple and direct
