Yufin, 2018-05-02 This volume presents technical papers devoted to development and practical use of computer methods in geotechnical and geoenviromental engineering It covers issues on space use and construction soil and rock mechanics and mining applications amongst other topics *Flying Cars, Amphibious Vehicles and Other Dual Mode Transports* George W. Green, 2010-07-15 It wasn't very long after the first commercially viable automobiles came on the scene that ambitious engineers began to dream of vehicles that could travel not only on land but also in the air or by water For a century talented designers have created unique dual purpose vehicles for land water and air in various pairings for both civil and military applications Sometimes converted from standard vehicles sometimes beginning as clean sheet designs these machines have met the engineering and economic challenges of dual mode travel with varying degrees of success This book describes a fascinating array of these vehicles from the United States and abroad including flying automobiles roadable aircraft amphibious vehicles hovercraft road rail trains and triphibious inventions Elliptic Differential Equations Wolfgang Hackbusch, 2017-06-01 This book simultaneously presents the theory and the numerical treatment of elliptic boundary value problems since an understanding of the theory is necessary for the numerical analysis of the discretisation It first discusses the Laplace equation and its finite difference discretisation before addressing the general linear differential equation of second order The variational formulation together with the necessary background from functional analysis provides the basis for the Galerkin and finite element methods which are explored in detail A more advanced chapter leads the reader to the theory of regularity Individual chapters are devoted to singularly perturbed as well as to elliptic eigenvalue

problems The book also presents the Stokes problem and its discretisation as an example of a saddle point problem taking into account its relevance to applications in fluid dynamics *Field & Stream* ,1997-07 FIELD STREAM America s largest outdoor sports magazine celebrates the outdoor experience with great stories compelling photography and sound advice while honoring the traditions hunters and fishermen have passed down for generations Underground Infrastructure Research M. Willmore,Dwight D. Bennett,1955 Algebraic and Geometric Ideas in the Theory of Discrete Optimization Jesus A. De Loera,Raymond Hemmecke,Matthias K?ppe,2012-01-01 This book presents recent advances in the mathematical theory of discrete optimization particularly those supported by methods from algebraic geometry commutative algebra convex and discrete geometry generating functions and other tools normally considered outside the standard curriculum in optimization **Thermomechanics of Composite Structures under High Temperatures** Yu. I. Dimitrienko,2016-01-14 This pioneering book presents new models for the thermomechanical behavior of composite materials and structures taking into account internal physico chemical transformations such as thermodecomposition sublimation and melting at high temperatures up to 3000 K It is of great importance for the design of new thermostable materials and for the investigation of reliability and fire safety of composite structures It also supports the investigation of interaction of composites with laser irradiation and the design of heat shield systems Structural methods are presented for calculating the effective mechanical and thermal properties of matrices fibres and unidirectional reinforced by dispersed particles and textile composites in terms of properties of their constituent phases Useful calculation methods are developed for characteristics such as the rate of thermomechanical erosion of composites under high speed flow and the heat

deformation of composites with account of chemical shrinkage The author expansively compares modeling results with experimental data and readers will find unique experimental results on mechanical and thermal properties of composites under temperatures up to 3000 K Chapters show how the behavior of composite shells under high temperatures is simulated by the finite element method and so cylindrical and axisymmetric composite shells and composite plates are investigated under local high temperature heating The book will be of interest to researchers and to engineers designing composite structures and invaluable to materials scientists developing advanced performance thermostable materials Field & Stream ,1996-01 FIELD STREAM America s largest outdoor sports magazine celebrates the outdoor experience with great stories compelling photography and sound advice while honoring the traditions hunters and fishermen have passed down for generations **Space Stations** Ernst Messerschmid,Reinhold Bertrand,2013-06-29 Construction has begun on the International Space Station ISS the largest and most complex extraterrestrial construction project ever This book on space stations and the ISS in particular describes component technologies systems integration and the potential utilization of these stations Co authored by Messerschmid one of the first German astronauts it addresses students and engineers in space technology but will interest astronomy and space enthusiasts as well *Machine Learning and Knowledge Discovery in Databases* Toon Calders,Floriana Esposito,Eyke Hüllermeier,Rosa Meo,2014-09-01 This three volume set LNAI 8724 8725 and 8726 constitutes the refereed proceedings of the European Conference on Machine Learning and Knowledge Discovery in Databases ECML PKDD 2014 held in Nancy France in September 2014 The 115 revised research papers presented together with 13 demo track papers 10 nectar track papers 8 PhD track papers and 9 invited talks were carefully reviewed and selected from 550 submissions The papers cover the latest high quality interdisciplinary research results in all areas related to machine learning and knowledge discovery in databases
