*Asia in Post-Western Age*, 2014-09-15 The great geopolitician Halford J Mackinder had the dream that Monsoon Asia when it grows to prosperity will balance those who live between Missouri and the Yenisei In *Asia in Post Western Age* Niraj Kumar offers a vivid picture of the global distribution of material power and the emergence of three pan regions envisaged by German Nazi geopolitician Karl Haushofer fuelled by the logic of regionalised globalisation These pan regions will be glued by corresponding Pan Ideas of Atlanticism Eurasianism and Asianism The trialectics between these three pan regions will establish harmony and balance The diplomacy in multipolar world will no longer be deciphered through the sports metaphor of chess football or boxing but the universal game of hopscotch *Asia in Post Western Age* is an indispensable interdisciplinary work about contemporary global conflicts as well as future trends and proposes a way to establish Kant's perpetual peace

**Behold a Pale Farce** Bill Blunden, Violet Cheung, 2014-04-01 This book presents a data driven message that exposes the cyberwar media campaign being directed by the Pentagon and its patronage networks By demonstrating that the American public is being coerced by a threat that has been blown out of proportion much like the run up to the Gulf War or the global war on terror this book discusses how the notion of cyberwar instills a crisis mentality that discourages formal risk assessment making the public anxious and hence susceptible to ill conceived solutions With content that challenges conventional notions regarding cyber security *Behold a Pale Farce* covers topics including cybercrime modern espionage mass surveillance systems and the threats facing infrastructure targets such as the Federal Reserve the stock exchange and telecommunications in a way that provides objective analysis rather than advocacy This book is a must read for anyone concerned with the recent emergence of Orwellian tools of mass interception that have developed under the guise of national security

**Strategic Cyber Deterrence** Scott Jasper, 2017-07-08 According to the FBI about 4000 ransomware attacks happen every day In the United States alone victims lost 209 million to ransomware in the first quarter of 2016 Even worse is the threat to critical infrastructure as seen by the malware infections at electrical distribution companies in Ukraine that caused outages to 225 000 customers in late 2015 Further recent reports on the Russian hacks into the Democratic National Committee and subsequent release of emails in a coercive campaign to apparently influence the U S Presidential Election have brought national attention to the inadequacy of cyber deterrence The U S government seems incapable of creating an adequate strategy to alter the behavior of the wide variety of malicious actors seeking to inflict harm or damage through cyberspace This book offers a systematic analysis of the various existing strategic cyber deterrence options and introduces the alternative strategy of active cyber defense It examines the array of malicious actors operating in the domain their methods of attack and their motivations It also provides answers on what is being done and what could be done by the government and industry to convince malicious actors that their attacks will not succeed and that risk of repercussions exists Traditional deterrence strategies of retaliation denial and entanglement appear to lack the necessary conditions of capability

credibly and communications due to these malicious actors advantages in cyberspace In response the book offers the option of adopting a strategy of active cyber defense that combines internal systemic resilience to halt cyber attack progress with external disruption capacities to thwart malicious actors objectives It shows how active cyber defense is technically capable and legally viable as an alternative strategy for the deterrence of cyber attacks      *Investment Treaties and the Rule of Law* Promise N. Jansen Calamita,Ayelet Berman,2022-10-06 Investment treaties are said to improve the rule of law in the states which enter into them Fearing claims governments will internalise international investment obligations into their decision making processes resulting in positive spill over effects on the rule of law Such arguments have never been backed by empirical research This book presents an analytical framework for thinking about the internalisation of international commitments in governmental decision making that takes account of the complexities of governance In so doing it provides a typology of processes whereby international treaty obligations may be internalised by governments and identifies factors which may affect whether and to what extent international commitments are internalised in governmental decision making This framework serves as the background for the main body of the book in which empirical case studies address whether and how a select group of governments in Asia internalise international investment treaty obligations in their decision making

**History of Soy Sprouts (100 CE To 2013)** William Shurtleff,Akiko Aoyagi,2013      **The U.S. Intelligence Community** Jeffrey T Richelson,2018-05-04 The role of intelligence in US government operations has changed dramatically and is now more critical than ever to domestic security and foreign policy This authoritative and highly researched book written by Jeffrey T Richelson provides a detailed overview of America s vast intelligence empire from its organizations and operations to its management structure Drawing from a multitude of sources including hundreds of official documents The US Intelligence Community allows students to understand the full scope of intelligence organizations and activities and gives valuable support to policymakers and military operations The seventh edition has been fully revised to include a new chapter on the major issues confronting the intelligence community including secrecy and leaks domestic spying and congressional oversight as well as revamped chapters on signals intelligence and cyber collection geospatial intelligence and open sources The inclusion of more maps tables and photos as well as electronic briefing books on the book s Web site makes The US Intelligence Community an even more valuable and engaging resource for students      *Hard Target* Stephan Haggard,Marcus Noland,2017-05-30 Because authoritarian regimes like North Korea can impose the costs of sanctions on their citizens these regimes constitute hard targets Yet authoritarian regimes may also be immune and even hostile to economic inducements if such inducements imply reform and opening This book captures the effects of sanctions and inducements on North Korea and provides a detailed reconstruction of the role of economic incentives in the bargaining around the country s nuclear program Stephan Haggard and Marcus Noland draw on an array of evidence to show the reluctance of the North Korean leadership to weaken its grip on foreign economic activity They argue that inducements have

limited effect on the regime and instead urge policymakers to think in terms of gradual strategies Hard Target connects economic statecraft to the marketization process to understand North Korea and addresses a larger debate over the merits and demerits of engagement with adversaries

New Silent Cinema Katherine Groo,Paul Flaig,2015-09-16 With the success of Martin Scorsese's *Hugo* 2011 and Michel Hazanavicius's *The Artist* 2011 nothing seems more contemporary in recent film than the styles forms and histories of early and silent cinemas This collection considers the latest return to silent film alongside the larger historical field of visual repetitions and affective currents that wind their way through 20th and 21st century visual cultures Contributors bring together several fields of research including early and silent cinema studies experimental and new media historiography and archive theory and studies of media ontology and epistemology Chapters link the methods concerns and concepts of early and silent film studies as they have flourished over the last quarter century to the most recent developments in digital culture from YouTube to 3D recasting this contemporary phenomenon in popular culture and new media against key debates and concepts in silent film scholarship An interview with acclaimed Canadian filmmaker Guy Maddin closes out the collection

*In the Event of Women* Tani Barlow,2021-09-20 In the Event of Women outlines the stakes of what Tani Barlow calls the event of women Focusing on the era of the late nineteenth century through the mid twentieth century's Cultural Revolution Barlow shows that an event is a politically inspired action to install a newly discovered truth in this case the mammal origins of human social evolution Highbrow and lowbrow social theory circulating in Chinese urban print media placed humanity's origin story in relation to commercial capital's modern advertising industry and the conclusion that women's liberation involved selling buying and advertising industrial commodities The political struggle over how the truth of women in China would be performed and understood Barlow shows means in part that an event of women was likely global because its truth is vested in biology and physiology In so doing she reveals the ways in which historical universals are effected in places

where truth claims are not usually sought This book reconsiders Alain Badiou's concept of the event particularly the question of whose political moment marks newly discovered truths

*Power Trip* Michael E. Webber, 2019-05-07 A global tour of energy the builder of human civilization and also its greatest threat Energy is humanity's single most important resource In fact as energy expert Michael E Webber argues in *Power Trip* the story of how societies rise can be told largely as the story of how they manage energy sources through time In 2019 as we face down growing demand for and accumulating environmental impacts from energy we are at a crossroads and the stakes are high But history shows us that energy's great value is that it allows societies to reinvent themselves *Power Trip* explores how energy has transformed societies of the past and offers wisdom for today's looming energy crisis There is no magic bullet energy advances always come with costs Scientific innovation needs public support Energy initiatives need to be tailored to individual societies We must look for long term solutions Our current energy crisis is real but it is solvable We have the power

*Strategic Reassurance and Resolve* James Steinberg, Michael E. O'Hanlon, 2015-08-25 How the United States and China can avoid future conflict and establish stable cooperative relations After forty years of largely cooperative Sino U S relations policymakers politicians and pundits on both sides of the Pacific see growing tensions between the United States and China Some go so far as to predict a future of conflict driven by the inevitable rivalry between an established and a rising power and urge their leaders to prepare now for a future showdown Others argue that the deep economic interdependence between the two countries and the many areas of shared interests will lead to more collaborative relations in the coming decades In this book James Steinberg and Michael O Hanlon stake out a third less deterministic position They argue that there are powerful domestic and international factors especially in the military and security realms that could well push the bilateral relationship toward an arms race and confrontation even though both sides will be far worse off if such a future comes to pass They contend that this pessimistic scenario can be confidently avoided only if China and the United States adopt deliberate policies designed to address the security dilemma that besets the relationship between a rising and an established power The authors propose a set of policy proposals to achieve a sustainable relatively cooperative relationship between the two nations based on the concept of providing mutual strategic reassurance in such key areas as nuclear weapons and missile defense space and cyber operations and military basing and deployments while also demonstrating strategic resolve to protect vital national interests including in the case of the United States its commitments to regional allies

**The Principle of ne bis in idem in International Criminal Law** Gaiane Nuridzhanian, 2024-06-14 The legal principle of ne bis in idem proclaims that no person shall be tried twice for the same matter This principle is important in theory and practice as it safeguards a fundamental individual interest and spares the accused the burden of a repeat trial This book provides a comprehensive examination of the ne bis in idem principle in international criminal law Readers will find a detailed account of ne bis in idem rules in the law and practice of the International Criminal Court and other international criminal courts The book also examines international law ne bis in

idem rules that govern the domestic prosecution of international crimes The book will be a valuable resource for researchers academics and policy makers working in the areas of International Criminal Law and International Human Rights law It will be of particular use to those interested in defense rights admissibility of cases before international criminal courts and issues arising from prosecution of international crimes in multiple criminal jurisdictions **The New Calculus of Escalation**

Martin C. Libicki, 2025-05-02 A reevaluation of conflict thresholds in the context of complex cyber conventional and nuclear war The return of great power competition has renewed concerns about managing escalation lest a minor crisis inadvertently spiral into nuclear war This has become apparent during the war between Russia and Ukraine as Western aid for Ukraine has been predicated on avoiding Russian escalation The New Calculus of Escalation updates our understanding of conflict escalation dynamics for the twenty first century with the goal of reducing the possibility of a catastrophic war To improve mutual understanding among states Libicki rethinks conflict thresholds and exit ramps that manage escalation During the Cold War there were two critical thresholds one between peace and war and one between conventional war and nuclear war But ongoing developments in cyber and other advanced military technologies threaten command and control and blur the old thresholds Military strategists international relations scholars and graduate students will benefit from this book s cogent analytic framework in shaping future debates **The Internet in Everything**

Laura DeNardis, 2020-01-07 A compelling argument that the Internet of things threatens human rights and security Sobering and important Financial Times Best Books of 2020 Technology The Internet has leapt from human facing display screens into the material objects all around us In this so called Internet of things connecting everything from cars to cardiac monitors to home appliances there is no longer a meaningful distinction between physical and virtual worlds Everything is connected The social and economic benefits are tremendous but there is a downside an outage in cyberspace can result not only in loss of communication but also potentially in loss of life Control of this infrastructure has become a proxy for political power since countries can easily reach across borders to disrupt real world systems Laura DeNardis argues that the diffusion of the Internet into the physical world radically escalates governance concerns around privacy discrimination human safety democracy and national security and she offers new cyber policy solutions In her discussion she makes visible the sinews of power already embedded in our technology and explores how hidden technical governance arrangements will become the constitution of our future

This book indicates the shortcomings of the current international legal system and customary international norms that govern international aviation law to comply with contemporary air transport market realities As the air transport market develops globally the safety regime of civil aviation should also be governed and applied globally In this book the author departs from current international legal norms to examine the emerging legal field of global administrative law Through that lens the possibility of reconstructing the set of legal mechanisms that govern domestic and international administrative interaction in the global field of aviation safety is explored This book demonstrates that a legal system is never complete but always develops in tandem with changing needs i e the participation of the affected parties Exploring the principles of GAL theory contributes to addressing the contemporary legal issues relating to state compliance with international aviation safety standards that would otherwise not be covered by customary international law In particular the principles of GAL theory regarding global governance and the public character of global regulations the role of individuals and states in global governance and state sovereignty are considered valuable contributions to contemporary global aviation safety issues in practice It is asserted in this book that proper checks and balances in global aviation safety can be improved by making these accessible to individuals by way of national courts Finally establishing public awareness of global aviation safety standards will eventually create greater pressure on states to implement and enforce them This book is in an area increasing academic and research interest of practitioners of public international aviation law global administrative law global governance and global aviation safety global air transport market regulations     *Healing Historical Trauma in South Korean Film and Literature* Chungmoo Choi, 2020-12-20 Through South Korean filmic and literary texts this book explores affect and ethics in the healing of historical trauma as alternatives to the measures of transitional justice in want of national unity Historians and legal practitioners who deal with transitional justice agree that the relationship between historiography and justice seeking is contested this book reckons with this question of how much truth telling from a violent past will lead to healing forgiving

forgetting and finally overcoming resentment Nuanced interpretations of South Korean filmic and literary texts are featured including Park Chan wook s Oldboy Bong Joon ho s Mother and literary texts of Han Kang and Ch oe Yun whilst also engaging the ethical and political philosophy of Levinas Hannah Arendt and others Also offered is new and extensive research into the hitherto hidden history of thousands of North Korean war orphans who were sent to Eastern European countries for care Grappling with the evils of history the films and novels examined herein find their ultimate themes in compassion hospitality humility and solidarity of the wounded Healing Historical Trauma in South Korean Film and Literature will appeal to students and scholars of film comparative literature cultural studies and Korean studies more broadly

## Adopting the Melody of Expression: An Emotional Symphony within **Maxim Korea July 2013**

In a world taken by screens and the ceaseless chatter of quick communication, the melodic beauty and mental symphony produced by the published term often disappear into the background, eclipsed by the persistent sound and distractions that permeate our lives.
