Free Market Criminal Justice Darryl K. Brown, 2015-12-22 Free Market Criminal Justice explains how faith in democratic politics and free markets has undermined the rule of law in US criminal process America's unique political development characterized by skepticism of government power has restrained the state's role not only in the economic realm but also in key parts of its criminal justice systems From charging decisions through trials or guilty pleas and appeals legal safeguards against bias wrongful convictions and excessive punishment rely more on politics and laissez faire economic ideas than on enforceable rules and duties Prosecutorial discretion is checked not by legal standards but by popular elections and plea bargaining law is wholly built on a faith in unregulated markets in contrast to the systems in other common law countries that also have neoliberal economies adversarial process and high guilty plea rates This book argues that democratic and market ideas have led to more partisan prosecutors narrower duties of evidence disclosure and to a right to defense counsel that carefully accommodates preexisting wealth inequalities Most important democratic and market values have diminished the responsibility of judges and of the state itself for the accuracy and integrity of court judgments Paradoxically skepticism of government has expanded state power reduced checks on executive officials marginalized juries and contributed to record incarceration rates In contrast to

recent arguments for re invigorating democracy in criminal process Free Market Criminal Justice argues that to strengthen the rule of law US criminal justice needs less democracy fewer market mechanisms and more law
