Rethinking the Economics of Land and Housing Josh Ryan-Collins, Toby Lloyd, Laurie Macfarlane, 2017-02-28 Why are house prices in many advanced economies rising faster than incomes Why isn t land and location taught or seen as important in modern economics What is the relationship between the financial system and land In this accessible but provocative guide to the economics of land and

housing the authors reveal how many of the key challenges facing modern economies including housing crises financial instability and growing inequalities are intimately tied to the land economy Looking at the ways in which discussions of land have been routinely excluded from both housing policy and economic theory the authors show that in order to tackle these increasingly pressing issues a major rethink by both politicians and economists is required **Arithmetic of Finite Fields**

Çetin Kaya Koç,Sihem Mesnager,Erkay Savaş,2015-02-21 This book constitutes the refereed proceedings of the 5th International Workshop on the Arithmetic of Finite Field WAIFI 2014 held in Gebze Turkey in September 2014 The 9 revised full papers and 43 invited talks presented were carefully reviewed and selected from 27 submissions This workshop is a forum of mathematicians computer scientists engineers and physicists performing research on finite field arithmetic interested in communicating the advances in the theory applications and implementations of finite fields The workshop will help to bridge the gap between the mathematical theory of finite fields and their hardware software implementations and technical applications *Domestic and Foreign Mutual Funds in Mexico* Jasmine Xiao,2015-05-13 This paper utilizes a new dataset of foreign and domestic mutual funds in Mexico to assess their behavior and obtains three new findings First foreign mutual funds are more sensitive to global financial conditions and engage more in herding and positive feedback trading than domestic mutual funds notably during episodes of market stress Second the behavior of foreign funds differs substantially across types of funds bond funds are more sensitive to global factors and engage more in positive feedback trading than equity funds funds sold to retail investors open end funds small funds and regional funds also appear to be less stable sources of capital flows Third there is indicative evidence that foreign funds trading behavior is associated with higher local market volatilities notably in periods of market stress however domestic mutual fund investors played some mitigating role

Comparing the Performance of Logit and Probit Early Warning Systems for Currency Crises in Emerging Market Economies Mr.Fabio Comelli,2014-04-17 We compare how logit fixed effects and probit early warning systems EWS predict insample and out of sample currency crises in emerging markets EMs We look at episodes of currency crises that took place in 29 EMs between January 1995 and December 2012 Stronger real GDP growth rates and higher net foreign assets significantly reduce the probability of experiencing a currency crisis while high levels of credit to the private sector increase it We find that the logit and probit EWS out of sample performances are broadly similar and that the EWS performance can be very sensitive both to the size of the estimation sample and to the crisis definition employed For macroeconomic policy purposes we conclude that a currency crisis definition identifying more rather than less crisis episodes should be used even if this may lead to the risk of issuing false alarms *Exploring Gender and Sex Differences in Behavioral Dyscontrol: from Drug Addiction to Impulse Control Disorders* Liana Fattore,Miriam Melis,2016-04-13 Males and females exhibit discrete attitudes and skills experience dissimilar emotional and psychological needs and react differently to peer pressure lack of self realization or other personal and social expectations In addition they are differently influenced by

family history and diverge in the perception of self image and health risks To complicate the matter on gender dichotomy male testosterone levels markedly vary over the course of the day while female levels of sex hormones significantly fluctuate depending upon the menstrual cycle the pre or post menopausal age and the use of oral contraceptives All of these factors interact with genetic background and sex hormonal fluctuations and determine the differences observed in their predisposition to develop an addiction This term is traditionally associated to the abuse of legal and illegal substances However a compulsion toward the engagement in a non drug related rewarding behavior usually involving a natural reward also activates the brain reward system and engenders persistent behavior thus resulting in a diminished control over it These latter behaviors are defined as behavioral addictions This definition encompasses any behavior characterized by the followings i feeling of tension or arousal before the action ii gratification and or relief at the time of performing the act iii inability to resist an urge or drive even against great obstacles or dangers iv absence of consideration for the negative consequences that may affect family friends and or work As such behavioral addictions include compulsive food intake and sexual activity pathological gambling and Internet addiction excessive exercising compulsive buying and pyromania These behaviors which are often classified as impulse control disorders result in actions that are harmful to oneself and or others share common features e g compulsiveness impulsivity impaired decision making craving tolerance withdrawal high rates of relapse and involve dysfunction of several brain circuits Derangement from functional neurobiological mechanisms underpinning both sensitivity to reward and inhibitory control can also lead to compulsive behaviors For instance pathological gambling and other impulse control disorders e g hypersexuality compulsive painting eating and buying are often reported in Parkinson s disease patients Gender dependent differences in the rate of initiation and frequency of misuse of addicting drugs have been widely described Yet men and women also differ in their propensity to become addicted to other rewarding stimuli e g sex food or activities e g gambling exercising The goal of the present Research Topic is to explore and summarize current evidence for gender and sex differences not only in drug addiction but also in other forms of addictive behaviors Thus it will include studies showing gender dependent differences in drug addiction food addiction compulsive sexual activity pathological gambling Internet addiction and physical exercise addiction Psychiatric comorbidity potential risk factors and the underlying neural mechanisms will be also examined with particular emphasis to the role of sex hormones in modulating addictive and compulsive behaviors

The Traffic Bulletin ,1924 *Rediscovering Economic Policy as a Discipline* Nicola Acocella,2018-07-26 Government interventions in market failures can encounter objections from those who doubt their efficacy Acocella a leading expert on economic policy counters these unfounded criticisms making the convincing case for the foundation coordination and reach of government action through economic policy Arguing for the governmental potential to devise democratic fair and effective institutions and policies this book also demonstrates the validity of the principles outlined by Frisch and Tinbergen amongst others for controlling the economy in a strategic context equivalent to

the rational expectations assumption Demonstrating how unconventional monetary policies such as macro prudential regulation new fiscal rules and new forms of international policy coordination can offer an effective response to the multiplicity of current economic issues the recent financial crisis arguably indicates that economic policy must once again take centre stage as the applied complement to mainstream economic theory **International Conference on**
