Ján Buček,Andrew Ryder,2015-04-15 This book looks at experience in government restructuring and devolution from a variety of national and international perspectives both within the European Union and elsewhere focusing on lessons learned and ways forward Since the 1980s there has been a global trend to give more power to local governments Even in Korea and the United Kingdom the most centralised countries in the OECD local government powers have increased with substantial economic benefits Within the European Union the principle of subsidiarity has enshrined the idea of devolution New member states particularly in central and eastern Europe have significantly created new and self sufficient local and regional governments However this process has been complicated Devolution is not a panacea in its own right and need not lead to economic

growth While it can encourage savings through collaboration it can also lead to confused lines of authority and can complicate policy formation and implantation Devolution can strain local budgets forcing local governments to rely on their own sources of finance rather than central government transfers Suburbanisation rural depopulation the growth of some regions and the decline of others have raised new problems particularly related to inter governmental cooperation among local governments and different levels of government In many cases an increased number of governments has increased administrative costs

The Political Economy of City Branding Ari-Veikko Anttiroiko,2014-02-24

Globalization affects urban communities in many ways One of its manifestations is increased intercity competition which compels cities to increase their attractiveness in terms of capital entrepreneurship information expertise and consumption This competition takes place in an asymmetric field with cities trying to find the best possible ways of using their natural and created assets the latter including a naturally evolving reputation or consciously developed competitive identity or brand The Political Economy of City Branding discusses this phenomenon from the perspective of numerous post industrial cities in North America Europe East Asia and Australasia Special attention is given to local economic development policy and industrial profiling and global city rankings are used to provide empirical evidence for cities characteristics and positions in the global urban hierarchy On top of this social and urban challenges such as creative class struggle are also discussed The core message of the book is that cities should apply the tools of city branding in their industrial promotion and specialization but at the same time take into account the special nature of their urban communities and be open and inclusive in their brand policies in order to ensure optimal results This book will be of interest to scholars and practitioners working in the areas of local economic development urban planning public management and branding

Oil Booms and Business Busts

Nimah Mazaheri, 2016-05-02 Oil Booms and Business Busts looks at how government policymaking shapes a puzzling phenomenon in economic development the curse of natural resources It investigates how oil and mineral wealth shapes a government's policies toward the business environment entrepreneurs and innovative activities Other similar work either ignores the role of government policymaking in oil wealth treats it as another effect of the rentier state or dismisses it as illogical and incoherent One might expect that in light of such abundances governments would encourage entrepreneurship and new businesses to compete and grow in the market but Nimah Mazaheri shows that resource wealth instead incentivizes policymakers to focus on satisfying the interests of existing elites They more than oil poor nations institute barriers that impede the activities of domestic firms and entrepreneurs with the result being unimpressive economic performance over the past half century This is the first book to examine how oil wealth affects non elite actors who own the small and medium sized firms that absorb a majority of the economic and labor force of these countries Looking at two of the most important oil producing countries in the world Iran and Saudi Arabia the book provides an original theory about the factors that shape a logic of policymaking in oil producing states To extend his theory Mazaheri also looks at India which is one of the world's main coal producers He does this to show the effects of the gain and loss of a massive resource windfall on state policymaking toward the private sector Ultimately Mazaheri argues that such policymaking impedes the development of a middle class and therefore democratization a factor that can have overarching political repercussions for governmental stability

Yet after more than four decades of economic reform the Egyptian economy still fails to meet popular expectations for inclusive growth better standards of living and high quality employment While many analysts point to cronyism and corruption Amr Adly finds the root causes of this stagnation in the underlying social and political conditions of economic development Cleft Capitalism offers a new explanation for why market based development can fail to meet expectations small businesses in Egypt are not growing into medium and larger businesses The practical outcome of this missing middle syndrome is the continuous erosion of the economic and social privileges once enjoyed by the middle classes and unionized labor without creating enough winners from market making This in turn set the stage for alienation discontent and finally revolt With this book Adly uncovers both an institutional explanation for Egypt s failed market making and sheds light on the key factors of arrested economic development across the Global South **Affordable Housing in the Urban Global**
