The English Cyclopaedia: Cyclopaedia of natural history Charles Knight, 1856 Locus Solus Selen Ansen, Süreyya Evren, 2022-06-01 Arter initiated a new publication series ARTER BACKGROUND in 2019 to accompany exhibitions drawn from its collection which holds more than 1 400 works of art The fourth book of the series accompanies Locus Solus which brings together selected works from the Arter Collection with several large scale installations including site specific new productions with an aim to explore the idea of nature through the lens of facts fictions and emotions In the book excerpts of textual and visual contents selected around the ideas active in the curatorial process of the exhibition are complemented by new works produced specifically for this context While the exhibition curated by Selen Ansen deals with the ways in which nature and culture permeate and affect each other the accompanying publication through its distinctive editorial structure features texts pointing towards extinct territories subconscious landscapes foreign lands fictive rooms heres elsewheres and nowheres wonderlands heavenly earthly and subterranean realms alongside commissioned essays by

Sena Ba z Pascal Janovjak and Su Pola This book reflects the exhibition which it accompanies and whose spaces and reflections on the idea of nature it extends It amounts to a territory the contours of which are fluid semi autonomous inhabited by a variety of spaces and times One may peruse it while sitting standing or lying down in broad daylight or when the night has fallen in clear or foul weather in or outdoors just as one would with any other book that fell into one s hands One will probably make one s way into it unaccompanied since it is customary to read alone and in silence Once inside it will be preferable to keep one s eyes open in order to understand where one sets foot yet not to neglect to close them so as to be able to wander off beyond its borders This neither too long neither too short book is also a body a hybrid body composed of heterogeneous worlds and points of view assembled according to the good neighbour principle so cherished by Aby Warburg It compiles fragments of texts uprooted from their original context some of which are published as a whole others devised within the framework of the exhibition It also contains images some speechless others quite talkative which again have been deterritorialised moved out of their original context in order to become reterritorialised in new surroundings One will find less theory here than fiction fewer essays than narrations versified poetry and free prose a manifesto dictionary and encyclopaedia pages more solitude than crowds more vegetation than concrete at least as many unspoken as vocalised thoughts Selen Ansen with contributions by Sena Ba z John Berger Jen Bervin Karl Blossfeldt Richard Brautigan Charles Burns Joseph Conrad Julio Cort zar Karel apek Evliy elebi Ferit Edg Helmut Eisendle Gianni Guadalupi Marlen Haushofer Robert Hooke Pascal Janovjak Kamo no Ch mei Gizem Karaka Tetsumi Kudo D H Lawrence Leo Lionni Lucretius Maurice Maeterlinck Xavier de Maistre Alberto Manguel Winsor McCay Claudio Morandini Murathan Mungan Bar Pirhasan Pliny the Elder Su Pola Robert Pufleb Jochen Rai Iv n Repila Raymond Roussel Nadine Schlieper Carl Seelig Gertrude Stein Michel Tournier Robert Walser Aby Warburg Lynd Ward Volkan Yalazay

Francis Watkins and the Dollond Telescope Patent Controversy Brian Gee, edited by Anita McConnell, 2016-04-15 Francis Watkins was an eminent figure in his field of mathematical and optical instrument making in mid eighteenth century London Working from original documents Brian Gee has uncovered the life and times of an optical instrument maker who at first glance was not among the most prominent in his field In fact because Francis Watkins came from a landed background the diversification of his assets enabled him to weather particular business storms discussed in this book where colleagues without such an economic cushion were pushed into bankruptcy or forced to emigrate He played an important role in one of the most significant legal cases to touch this profession namely the patenting of the achromatic lens in telescopes The book explains Watkins s origins and how and why he was drawn into partnership with the famous Dollond firm who at that point were Huguenot incomers The patent for the achromatic telescope has never been satisfactorily explained in the literature and the author has gone back to the original legal documents never before consulted He teases out the problems lays out the evidence and comes to some interesting new conclusions showing the Dollonds as hard headed and ruthless businessmen ultimately extremely successful The latter part

of the book accounts for the successors of Francis Watkins and their decline after over a century of successful business in central London

Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals.
