Methodology

Gemini results: All Gemini scores are pass @1. "Single attempt" settings allow no majority voting or parallel test-time compute. "Multiple attempts" settings allow test-time selection of the candidate answer. They are all run with the AI Studio API with default sampling settings. To reduce variance, we average over multiple trials for smaller benchmarks. Aider Polyglot score is the pass rate average of 3 trials. Vibe-Eval results are reported using Gemini as a judge. Google's scaffolding for "multiple attempts" for SWE-bench includes drawing multiple trajectories and re-scoring them using model's own judgements. For Aider results differ from the official leaderboard due to a difference in the settings used for evaluation (non-default).

Result sources: Where provider numbers are not available we report numbers from leaderboards reporting results on these benchmarks. Humanity's Last Exam results are sourced from <https://big-lab.ai/> and https://scale.com/leaderboard/humanitas_last_exam, LiveCodeBench results are from <https://livecodebench.github.io/leaderboard.html> (1/1/2025 - 5/5/2025) in the US, Aider Polyglot numbers come from <https://aider.chat/docs/leaderboards/>, FACTS come from <https://www.google.com/benchmarks/facts/fact-grounding>, for MRCR v2 which is not publicly available yet we include 100k results as a cumulative score to ensure they can be comparable with other models and a pointwise value for 10 context window to show the capability of the model at full length. The terminology has changed in this table to previously published results for MRCR v2 as we have decided to focus on a harder, 8-needle version of the benchmark going forward.
