Forensic Document Examination Katherine M. Koppenhaver, 2007-12-06 This book introduces the reader to the basic principles of handwriting and the factors that affect their development The book discusses the basic concept of the characteristics of writing that are compared when making an identification or elimination of a writer In addition readers will be able to recognize the signs of forgery and disguise and to distinguish between simulation and disguise *Handwriting Features Guide* Nicole Crown, Raymond Marquis, Carolyn Bird, 2024-06-14 Forensic handwriting examination follows a process comprised of four main steps Analysis Comparison Evaluation and Verification ACE V While the process itself has

been described and refined very little effort has been undertaken to establish a clear and detailed list of features that the forensic handwriting examiner FHE must analyse in the first step of the examination In depth analysis of graphical features of handwritten texts or signatures is integral to the work of FHEs when requested to give an expert opinion typically to determine whether a questioned handwritten item has been written by a specific writer Indeed it is these graphical features that will be compared between questioned and known samples to establish similarities and differences that will finally be evaluated under two or more mutually exclusive propositions to reach a conclusion A robust analysis based on clearly defined features is necessary to provide reliable and unbiased opinions Numerous books and articles describe handwriting features that should be observed during the analysis stage of the examination However the descriptions can be vague and several authors may use different terms to describe the same feature It may also happen that the same term is used to define different characteristics Moreover illustrations of terms are often scarce and some times of little help to understand what the corresponding features are These problems are exacerbated when trying to equate terms in different languages This project presents a comprehensive depiction of writing features particularly found in Latin script relating to the whole hand written text or signature which the authors consider relevant to help answer questions commonly addressed by FHEs It is the authors hope that the FHE community utilises this illustrated list of writing features which we believe can promote a thorough and complete analysis and provide a common language for FHEs Thus this project seeks to contribute to establishing a systematic and standardized approach to forensic handwriting examination and move the discipline towards reproducibility and validation
