If you are not sure of the not understood any part of the quick start guide, please download the complete installation manual available at www.autopageusa.com. This quick start guide is a brief outline for professional installers that are familiar with the installation and operation of the remote start system. Please test all of your equipment to insure proper operation of the vehicle system returning to the customer. For additional technical support, please call 800-888-8888 and visit for the first available technician. Technical support hours are Monday through Saturday from 8:00 to 5:00 Pacific Standard Time.

The Remote Starter with Remote Entry System has been designed to be installed on Transponder systems with an automatic transponder (AT-43).

1. Check that the vehicle system is a remote transponder system.

2. The system must be installed and tested through a safety switch or it will not start in any forward or reverse gear.

3. Some automatic transponder vehicles having other DS-434 vehicles with a remote starter may have a mechanical key lock safety switch instead of electrical safety switch. The mechanical key lock does not interrupt the starter circuit when the transponder is in any gear and does not allow the 100% level of safety required for remote starting operation. Therefore, our system should never be installed on any vehicle that uses a mechanical key lock safety switch.

4. Once you install the system, you must verify that the vehicle will not start in any forward or reverse gear regardless of the type of vehicle.

5. Read the operation manual for operating the system.

6. Do not install any component near the battery, gas pedal or shifting linkage.

7. Some vehicles have a factory installed transponder immobilizer system that can severely compromise the installation. There is a possibility that the system cannot be installed on some immobilizer-equipped vehicles.

8. Many vehicles have an ABS or air system. The vehicle must not be in any gear or in any forward or reverse gear when the system is installed.

9. Disconnect the air battery before beginning work on the system.

10. Check battery grounds before driving any vehicle. Ensure that no wiring terminals or other components are located between the battery that would otherwise be damaged.

11. Do not use conventional jump box, battery or any wiring that wiring, i.e. repair parts will possibly obstruct connectivity into the alarm system and may result in false alarm or increased operation. The suggested installing of connection points.

12. Install the wiring neatly under carpets or under seat to prevent possible damage to wires.
