Toutkoushian, Ulrich Teichler, 2011-06-06 This ground breaking and exhaustive analysis of university ranking surveys scrutinizes their theoretical bases methodological issues societal impact and policy implications providing readers with a deep understanding of these controversial comparators The authors propose that university rankings are misused by policymakers and institutional leaders alike They assert that these interested parties overlook the highly problematic internal logic of ranking methodologies even as they obsess over the surveys assessment of their status The result is that institutions suffer from short termism realigning their resources to maximize their relative rankings While rankings are widely used in policy and academic discussions this is the first book to explore the theoretical and methodological issues of ranking itself It is a welcome contribution to an often highly charged debate Far from showing how to manipulate the system this collection of work by key researchers aims to enlighten interested parties      *Rankings and the Reshaping of Higher Education* E.

The Impact of Higher Education Ranking Systems on Universities Kevin Downing, Petrus Johannes Looek, Sarah Gravett, 2021-04-04 This book written by three

University Rankings William Yat Wai Lo, 2014-02-17 This book adopts a qualitative case study approach to provide the readers with a systematic delineation and interpretation of the implications of the university ranking phenomenon for Taiwan's higher education system It reviews the literature on different theories

concerning the global transformation of higher education and presents basic information on higher education in Taiwan. The author develops a four-dimensional framework for the analysis of the ranking phenomenon in the island state. First, the technological-ecological dimension aims to look into how the rankings have impacted Taiwan's higher education based on empirical findings from five Taiwanese public universities. Next, the technological-geographical dimension examines how Taiwan can use rankings to promote its interests in global higher education. The two conceptual dimensions focus on the relationship between the rankings and power in higher education. They show how the phenomenon can be read and explained through theoretical lenses from ecological and geographical perspectives. From an ecological perspective, the empirical evidence suggests that the influence of rankings varies throughout the academic hierarchy in Taiwan. The theoretical analysis then illustrates the relationship between the ranking phenomenon and the power structure in academic hierarchy. Geographically, while the empirical analysis is based on data from Taiwan, the theoretical analysis offers essential insights that help readers to understand the changing global landscape of higher education and its implications in East Asia.

Global University Rankings and the Politics of Knowledge Michelle Stack, 2021-06-17. For many institutions, to ignore your university's ranking is to become invisible, a risky proposition in a competitive search for funding. But rankings tell us little if anything about the education scholarship or engagement with communities offered by a university. Drawing on a range of research and inquiry-based methods, *Global University Rankings and the Politics of Knowledge* exposes how universities became servants to the education industry and its impact. Conceptually unique in its scope, *Global University Rankings and the Politics of Knowledge* addresses the lack of empirical research behind university and journal ranking systems. Chapters from internationally recognized scholars in decolonial studies provide readers with robust frameworks to understand the intersections of coloniality and Indigeneity and how they play out in higher education. Contributions from diverse geographical and disciplinary contexts explore the political economy of rankings within the contexts of the Global North and South and examine alternatives to media-driven rankings. This book allows readers to consider the intersections of power and knowledge within the wider contexts of politics, culture, and the economy to explore how assumptions about gender, social class, sexuality, and race underpin the meanings attached to rankings and to imagine a future that confronts and challenges cognitive, environmental, and social injustice.

**Is International Law International?** Anthea Roberts, 2017-09-18. This book takes the reader on a sweeping tour of the international legal field to reveal some of the patterns of difference, dominance, and disruption that belie international law's claim to universality. Pulling back the curtain on the divisible college of international lawyers, Anthea Roberts shows how international lawyers in different states, regions, and geopolitical groupings are often subject to distinct incoming influences and outgoing spheres of influence in ways that reflect and reinforce differences in how they understand and approach international law. These divisions manifest themselves in contemporary controversies such as debates about Crimea and the South China Sea. Not all approaches to international law are created

equal however Using case studies and visual representations the author demonstrates how actors and materials from some states and groups have come to dominate certain transnational flows and forums in ways that make them disproportionately influential in constructing the international This point holds true for Western actors materials and approaches in general and for Anglo American and sometimes French ones in particular However these patterns are set for disruption As the world moves past an era of Western dominance and toward greater multipolarity it is imperative for international lawyers to understand the perspectives and approaches of those coming from diverse backgrounds By taking readers on a comparative tour of different international law academies and textbooks the author encourages them to see the world through the eyes of others an essential skill in this fast changing world of shifting power dynamics and rising nationalism *How To Survive Your Doctorate* Matthiesen, Jane, Binder, Mario, 2009-09-01 The aim of this book is to present student perspectives via case studies on doing a Ph D and thus give potential or current Ph D candidates an insight into real life Most of the literature in the area focuses on academic models of learning and gives clinical advice on how to achieve the content of a Ph D However a doctoral degree requires many additional skills This is a light hearted approach which looks at the everyday interpersonal social and environmental issues associated with doing a PhD from application through to graduation **Assembly** West Point Association of Graduates (Organization), 1992 A Guide to Studying and Living in Britain Kris Rao, 2014-02-21 Every year more than 270 000 students from all around the world come to study in the UK and the number is growing by 10 per cent a year At present most students coming to the UK have to rely on information from their friends and brief leaflets and booklets supplied by universities This indispensable guide tells students all they need to know about Britain s higher education system the application process funding immigration controls health service accommodation study methods and employment opportunities as well as university life British customs and habits and lots of other information on day to day living in the UK *The Research Impact Agenda* Martyna Śliwa, Neil Kellard, 2021-11-11 This book contributes to the growing body of work addressing the processes and consequences of national governments audits of the performance of higher education institutions HEIs in different countries The book discusses one recent area of focus within these audits namely the measurement of universities societal and economic impact The Research Impact Agenda offers a problematisation of the research impact agenda especially in relation to the impact generated by academics based in schools of business and management It scrutinises the often unintended but nevertheless significant consequences of this agenda for individuals and higher education institutions such as the reproduction of existing inequalities in academia and the crowding out of other key activities of business schools It puts forward a range of recommendations for researchers policymakers university and business school leaders and individual academics The book will be of interest to a wide range of readers regardless of their formal position organisational affiliation or career stage who consider it important to reduce and remove inequalities and inequities within the HE sector and to make universities and business schools more inclusive The readers will benefit from

the opportunity to engage in reflection aimed at transforming the current framing delivery and assessment of business and management research impact
