Voices in Academic and Professional Discourse Sergio Maruenda Bataller, 2011-05-25 The demands of today's society for greater specialization have brought about a profound transformation in the humanities which are not immune to the competitive pressure to meet new challenges that are present in other sectors. Thus, lecturers and researchers in modern languages and applied linguistics departments have made great efforts to design syllabi and materials more attuned to the competences and requirements of potential working environments. At the same time, linguists have attempted to apply their expertise in wider areas, creating research institutes that focus on applying language and linguistics in different contexts and offering linguistic services to society as a whole. This book attempts to provide a global view of the multiple voices involved in interdisciplinary research and innovative proposals in teaching specialized languages while offering contributions that attempt to fill the demands of a varied scope of disciplines such as the sciences, professions or educational settings. The chapters in this book are made up of current research on these themes: discourse analysis in academic and professional genres, specialized translation, lexicology and terminology, and ICT research and teaching of specialized languages.

Effective Educational Programs, Practices, and Policies for English Learners Liliana Minaya-Rowe, 2014-10-01 The central issue of this volume is how to meet the linguistic and academic needs of the increasing numbers of English learners (ELs). At the center of educational turns is the role of school professionals in this Common Core Standards era. Teacher education programs and professional development or pre-service and in-service programs for teachers of ELs are currently being reframed to reflect the new demands placed on all teachers in light of the new standards. The expectation is that ELs can learn and their teachers possess the expertise to teach both discipline content and academic English at the same time. The large numbers of ELs across the country have created a wide gap between what teachers have been trained to do and the skills they need to teach and reach them effectively. This practical handbook brings together research, policy and practice on teacher effectiveness, pre-service and in-service programs in the context of student linguistic and cultural diversity. Key features include: Clearly articulated teacher training and professional development programs; Coverage of Common Core curriculum and a variety of instructional programs and practices with research-based tools to implement them; and Policies to equitably and effectively prepare ELs academically and linguistically.
