of animation and vice versa By adopting this perspective technological animation not only provides a new understanding of the processes behind animation but also lends a fresh perspective to the animated artifact In contrast to other types of animation where the technologically animated artifact is often dismissed as a perceptual error induced for instance by rhetoric or magic this study separates technological animation from notions of rhetorical or magical skills theurgy or divine intervention Specifically it concentrates on a subset of artificial animation solely produced through technical procedures exploring how various motive forces actively contributed to giving objects agency and impacting their viewers illuminating how the material conditions of the artifacts themselves played a role in the process of technological animation whether through the distinctive materiality of bronze or the design of a statuette's hinge
