Buried Glory Istvan Hargittai, 2013-09-19 Moscow's Novodevichy Cemetery is the final resting place of some of Russia's most celebrated figures from Khrushchev and Yeltsin to Anton Chekhov Sergei Eisenstein Nikolai Gogol and Mikhail Bulgakov Using this famed cemetery as symbolic starting point *Buried Glory* profiles a dozen eminent

Soviet scientists nine of whom are buried at Novodevichy men who illustrate both the glorious heights of Soviet research as well as the eclipse of science since the collapse of the USSR Drawing on extensive archival research and his own personal memories renowned chemist Istvan Hargittai bring these figures back to life placing their remarkable scientific achievements against the tense political backdrop of the Cold War Among the eminent scientists profiled here are Petr L Kapitza one of the most brilliant representatives of the great generation of Soviet physicists a Nobel Prize winner who risked his career and his life standing up for fellow scientists against Stalin Yulii B Khariton who ran the highly secretive Soviet nuclear weapons laboratory Arzamas 16 despite being Jewish and despite the fact that his father Boris had been sent to the labor camps And Andrei D Sakharov the father of the Soviet hydrogen bomb and a brilliant fighter for human rights for which he won the Nobel Peace Prize Along the way Hargittai shines a light on the harrowing conditions under which these brilliant researchers excelled Indeed in the post war period Stalin s anti Semitism and ongoing anti science measures devastated biology damaged chemistry and nearly destroyed physics The latter was saved only because Stalin realized that without physics and physicists there could be no nuclear weapons The extraordinary scientific talent nurtured by the Soviet regime belongs almost entirely to the past Buried Glory is both a fitting tribute to these great scientists and a fascinating account of scientific work behind the Iron Curtain
