MARK SCHEME for the October/November 2013 series

0470 HISTORY
0470/13 Paper 1, maximum raw mark 60

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

History Paper 1 0470 2013:

Urban Nature and Childhoods Iris Duhn, Karen Malone, Marek Tesar, 2020-06-29 This book challenges the notion that nature is a city's opposite and addresses the often overlooked concept of urban nature and how it relates to children's experiences of environmental education. The idea of nature deficit as well as concerns that children in cities lack for experiences of nature speaks to the anxieties that underpin urban living and a lack of natural experiences. The contributors to this volume provide insights into a more complex understanding of urban nature and of children's experiences of urban nature. What is learned if nature is not somewhere else but right here wherever we are? What does it mean for children's environmental learning if nature is a relationship and not an entity? How can such a relational understanding of urban nature and childhood support more sustainable and more inclusive urban living? In raising challenging questions about childhoods and urban nature, this book will stimulate much needed discussion to provoke new imaginings for researchers in environmental education, childhood studies, and urban studies. This book was originally published as a special issue of *Environmental Education Research*. *Neonatal Brain Injury and the Search for New Therapies* Daniel

Handbook of Research on Human-Computer

Interfaces, Developments, and Applications Rodrigues, João, Cardoso, Pedro, Monteiro, Jânio, Figueiredo,

Mauro, 2016-06-29 Human Computer Interaction (HCI) is easy to define yet difficult to predict. Encompassing the management, study, planning, and design of the ways in which users interact with computers, this field has evolved from using punch cards to force touch in a matter of decades. What was once considered science fiction is now ubiquitous. The future of HCI is mercurial, yet predictions point to the effortless use of high-functioning services. The *Handbook of Research on Human-Computer Interfaces, Developments, and Applications* is primarily concerned with emerging research regarding gesture interaction, augmented reality, and assistive technologies and their place within HCI. From gaming to rehabilitation systems, these new technologies share the need to interface with humans and, as computers become thoroughly integrated into everyday life, so does the necessity of HCI research. This handbook of research benefits the research needs of programmers, developers, students, and educators in computer science and researchers. **Oceania and the Victorian Imagination**

Professor Peter H. Hoffenberg, Professor Richard D. Fulton, 2013-04-28 Oceania or the South Pacific loomed large in the Victorian popular imagination. It was a world that interested the Victorians for many reasons, all of which suggested to them that everything was possible there. This collection of essays focuses on Oceania's impact on Victorian culture, most notably travel, writing, photography, international exhibitions, literature, and the world of children. Each of these had significant impact. The literature discussed affected mainly the middle and upper classes, while exhibitions and photography reached down into the working classes, as did missionary presentations. The experience of children was central to the Pacific's effects, as youthful encounters at exhibitions, chapel, home, or school formed lifelong impressions and experiences. It would be difficult to fully

understand the Victorians as they understood themselves without considering their engagement with Oceania While the contributions of India and Africa to the nineteenth century imagination have been well documented examinations of the contributions of Oceania have remained on the periphery of Victorian studies Oceania and the Victorian Imagination contributes significantly to our discussion of the non peripheral place of Oceania in Victorian culture

Health Politics in Europe Ellen M. Immergut, Karen M. Anderson, Camilla Devitt, Tamara Popic, 2021-06-02 Health Politics in Europe: A Handbook is a major new reference work which provides historical background and up to date information and analysis on health politics and health systems throughout Europe. In particular, it captures developments that have taken place since the end of the Cold War, a turning point for many European health systems with most post-communist transition countries privatizing their state-run health systems and many Western European health systems experimenting with new public management and other market-oriented health reforms. Following three introductory stage-setting chapters, the handbook offers country cases divided into seven regional sections, each of which begins with a short regional outlook chapter that highlights the region's common characteristics and divergent paths taken by the separate countries, including comparative data on health system financing, healthcare access, and the political salience of health. Each regional section contains at least one detailed main case followed by shorter treatments of the other countries in the region. Country chapters feature a historical overview focusing on the country's progression through a series of political regimes and the consequences of this history for the health system, an overview of the institutions and functioning of the contemporary health system, and a political narrative tracing the politics of health policy since 1989. This political narrative, the core of each country case, examines key health reforms in order to understand the political motivations and dynamics behind them and their impact on public opinion and political legitimacy. The handbook's systematic structure makes it useful for country-specific, cross-national, and topical research and analysis.
