Catton,1980-10-01 Our day to day experiences over the past decade have taught us that there must be limits to our tremendous appetite for energy natural resources and consumer goods Even utility and oil companies now promote conservation in the face of demands for dwindling energy reserves And for years some biologists have warned us of the direct correlation between scarcity and population growth These scientists see an appalling future riding the tidal wave of a worldwide growth of population and technology A calm but unflinching realist Catton suggests that we cannot stop this wave for we have already overshoot the Earth s capacity to support so huge a load He contradicts those scientists engineers and technocrats who continue to write optimistically about energy alternatives Catton asserts that the technological panaceas proposed by those who would harvest from the seas harness the winds and farm the deserts are ignoring the fundamental premise that the principals of ecology apply to all living things These principles tell us that within a finite system economic expansion is not irreversible and population growth cannot continue indefinitely If we disregard these facts our sagging American Dream will soon shatter completely **Renaissance Keywords** ItaMac Carthy,2017-07-05 Certain words played a crucial role in the making of the European Renaissance and still recur today in our shifting understanding of it Discretion and grace to take two examples studied here express how individuals thought about themselves each other and their experience of the world yet they are as hard to define as they are ever present in Renaissance discourse In this collection of essays scholars from across the Humanities offer new interpretations of these and other keywords to adopt Raymond Williams s term and investigate the vocabulary that not only accompanied but also produced the cultural transformations that made the Renaissance so distinctive A keywords approach to Renaissance Europe provides a rich contextual framework for the exploration of its central ideas It also highlights the need for fresh thinking on current histories of the age Seven Renaissance Keywords engages with the ongoing debate about the term Renaissance itself perhaps more our keyword than theirs and seeks alternative ways to understand a culture and society which produced conceptions of the self as much as it did art and science The result is an exploration at the cutting edge of contemporary research Ita Mac Carthy is Lecturer in Italian Studies at the University of Birmingham Railway Signal ,1901

renewed interest in De Morgan's life and work has coincided with the digitization of his extensive library revealing the extent to which he pioneered and influenced the development of not merely mathematics but also logic astronomy the history of mathematics education and bibliography This edited collection celebrates De Morgan as a polymath Drawing together multiple elements of his activity from a range of publications and archives its contributors reassess his academic work his place in his intellectual environment and his legacy The result offers new insight into De Morgan himself as well as the wider circles in which he moved including his family life **The Nation** ,1894 *The Bookseller* ,1898 **Catalog of**
