

## HUMAN GENETICS PRACTICE WORKSHEET #3

1. Explain the difference between incomplete and codominance.

*Incomplete dominance produces offspring with an intermediate trait (Red x white = pink). Codominance produces offspring with both traits (AA x BB = AB)*

Codominance Problems

2. In some chickens, the gene for feather color is controlled by codominance. The allele for black is B and the allele for white is W. The heterozygous phenotype is known as erminette (black and white spotted).

a. What is the genotype for black chickens? BB

b. What is the genotype for white chickens? WW

c. What is the genotype for erminette chickens? BW

3. If two erminette chickens were crossed, what is the probability that:

a. They would have a black chick? 25%

b. They would have a white chick? 25%

Parents: BW x BW Show the Punnett Square:

	B	W
B	BB	BW
W	BW	WW

4. A black chicken and a white chicken are crossed. What is the probability that they will have erminette chicks? 100%

Parents: BB x WW Show the Punnett Square:

	B	B
W	BW	BW
W	BW	BW

5. Roan is a coat color found in many animals, including horses, cattle and dogs.

It is defined generally as an even mixture of white and red hair. What offspring are expected from mating a roan bull and a roan cow?

RR = red 25%
WW = white 25%
RW = roan 50%

6. What phenotypes would you expect from a cross between a red bull and a white cow?

	R	W
R	RR	RW
W	RW	WW

7. Two short-tailed (Manx) cats are bred together. They produce three kittens with long tails, five short tails, and two without any tails. From these results, how do you think tail length in these cats are inherited? Show the genotypes for both the parents and the offspring to support your answer.

Long tail = LL

no tail = NN

Short tail = LN
LN x LN  
short x short

	L	N
L	LL	LN
N	LN	NN

Genetic Witness Jay Aronson, 2007-10-11 When DNA profiling was first introduced into the American legal system in 1987 it was heralded as a technology that would revolutionize law enforcement As an investigative tool it has lived up to much of this hype it is regularly used to track down unknown criminals put murderers and rapists behind bars and exonerate the innocent Yet this promise took ten turbulent years to be fulfilled In

Genetic Witness Jay D Aronson uncovers the dramatic early history of DNA profiling that has been obscured by the technique's recent success. He demonstrates that robust quality control and quality assurance measures were initially nonexistent; interpretation of test results was based more on assumption than empirical evidence and the technique was susceptible to error at every stage. Most of these issues came to light only through defense challenges to what prosecutors claimed to be an infallible technology. Although this process was fraught with controversy, inefficiency, and personal antagonism, the quality of DNA evidence improved dramatically as a result. Aronson argues, however, that the dream of a perfect identification technology remains unrealized.

Division of Computer Research and Technology, 1979 *Human Evolutionary Demography* Oskar Burger, Ronald Lee, Rebecca Sear, 2024-06-14 Human evolutionary demography is an emerging field blending natural science with social science. This edited volume provides a much needed interdisciplinary introduction to the field and highlights cutting edge research for interested readers and researchers in demography, the evolutionary behavioural sciences, biology, and related disciplines. By bridging the boundaries between social and biological sciences, the volume stresses the importance of a unified understanding of both in order to grasp past and current demographic patterns. Demographic traits and traits related to demographic outcomes including fertility and mortality rates, marriage, parental care, menopause, and cooperative behavior are subject to evolutionary processes. Bringing an understanding of evolution into demography therefore incorporates valuable insights into this field just as knowledge of demography is key to understanding evolutionary processes. By asking questions about old patterns from a new perspective, the volume composed of contributions from established and early career academics demonstrates that a combination of social science research and evolutionary theory offers holistic

understandings and approaches that benefit both fields Human Evolutionary Demography introduces an emerging field in an accessible style It is suitable for graduate courses in demography as well as upper level undergraduates Its range of research is sure to be of interest to academics working on demographic topics anthropologists sociologists demographers natural scientists working on evolutionary processes and disciplines which cross cut natural and social science such as evolutionary psychology human behavioral ecology cultural evolution and evolutionary medicine As an accessible introduction it should interest readers whether or not they are currently familiar with human evolutionary demography
