Hunters and Collectors Tom Griffiths,1996-04 Hunters and Collectors is about historical consciousness and environmental sensibilities in European Australia from the mid nineteenth century to the present It is in part a collective biography of amateur antiquarians archaeologists naturalists journalists and historians people who shaped the Australian historical imagination Dr Griffiths illuminates the way these avid collectors and investigators of the Australian land and of its indigenous inhabitants contributed a sense of identity at colony wide and eventually nationwide level He also considers the rise of professional history anthropology and archaeology in the universities which ignored the efforts of the amateurs Griffiths shows how the seemingly trivial activities of these hunters and collectors feed into the political and environmental debates of the 1990s This book is outstanding in its originality interpretative insight and literary flair

Reframing the Early Childhood Curriculum Jane Page,2002-01-04 Pre school children have fundamentally different attitudes towards the future and attendant notions of time and space For this reason early childhood professionals are optimally placed to lay important foundations for young children s long term development Children s flexibility of thought their positive and constructive outlook on life their sense of the continuity of time their creativity and imagination and their sense of personal connection with time and the future are all qualities that should be recognized and addressed in early childhood educational programmes as a means of counteracting the difficulty youths experience in knowing what to expect in their future lives and coming to understand their roles in shaping them Reframing the Early Childhood Curriculum offers fresh insight into examining futurists and early childhood theorists thinking of the
